Great Britain. Admiralty, 1928 **Inventory Control** Sven Axsäter, 2013-04-17 Modern information technology has created
new possibilities for more sophisticated and efficient control of supply chains Most organizations can reduce their material
flow costs substantially Inventory control techniques are very important components in this development process A thorough
understanding of relevant inventory models is a prerequisite for successful implementation I hope that this book will be a
useful tool in acquiring such an understanding Nearly ten years ago I wrote a Swedish book on inventory control This
previous book has been used in courses in production and inventory control at several Swedish engineering schools and has
also been appreciated by many practitioners in the field Positive reactions from many readers have occasionally made me
contemplate writing a new book in English on the same subject Encouraging support of this idea from the Kluwer Editors
Fred Hillier and Gary Folven finally convinced me to go ahead with the project The result is this new book which in many
ways differs from its Swedish predecessor Some differences are due to recent developments in inventory control Furthermore
this new book is in a sense more theoretical In particular it is to a larger extent focused on creating a good basic
understanding of different possible approaches when analyzing inventory models **Chinese Computational Linguistics**

Medical Image Computing and Computer-Assisted Intervention - MICCAI 2002 Takeyoshi Dohi,Ron Kikins,2003-06-30 The fifth international Conference in Medical Image Computing and Computer Assisted Intervention MICCAI 2002 was held in Tokyo from September 25th to 28th 2002 This was the first time that the conference was held in Asia since its foundation in 1998 The objective of the conference is to offer clinicians and scientists the opportunity to collaboratively create and explore the new medical field Specifically MICCAI offers a forum for the discussion of the state of art in computer assisted interventions medical robotics and image processing among experts from multi disciplinary professions including but not limited to clinical doctors computer scientists and mechanical and biomedical engineers The expectations of society are very high the advancement of medicine will depend on computer and device technology in coming decades as they did in the last decades We received 321 manuscripts of which 41 were chosen for oral presentation and 143 for poster presentation Each paper has been included in these proceedings in eight page full paper format without any differentiation between oral and poster papers Adherence to this full paper format along with the increased number of manuscripts surpassing all our

expectations has led us to issue two proceedings volumes for the first time in MICCAI's history. Keeping to a single volume by assigning fewer pages to each paper was certainly an option for us considering our budget constraints. However, we decided to increase the volume to offer authors maximum opportunity to argue the state of art in their work and to initiate constructive discussions among the MICCAI audience.
