Design Decisions under Uncertainty with Limited Information Efstratios Nikolaidis, Zissimos P. Mourelatos, Vijitashwa Pandey, 2011-02-18

Today s business environment involves design decisions with significant uncertainty To succeed decision makers should replace deterministic methods with a risk based approach that accounts for the decision maker s risk tolerance In many problems it is impractical to collect data because rare or one time events are involved Therefore we need a methodology to model uncertainty and make choices when we have limited information This methodology must use all available information and rely only on assumptions that are supported by evidence This book explains theories and tools to represent uncertainty using both data and expert judgment It teaches the reader how to make design or business decisions when there is limited information with these tools Readers will learn a structured risk based approach which is based on common sense principles for design and business decisions These decisions are consistent with the decision maker s risk attitude The book is exceptionally suited as educational material

because it uses everyday language and real life examples to elucidate concepts It demonstrates how these concepts touch our lives through many practical examples questions and exercises These are designed to help students learn that first they should understand a problem and then establish a strategy for solving it instead of using trial and error approaches This volume is intended for undergraduate and graduate courses in mechanical civil industrial aerospace and ocean engineering and for researchers and professionals in these disciplines It will also benefit managers and students in business administration who want to make good decisions with limited information Applied Probability and Stochastic Processes V.
