

THREADING THE TOP THREAD

C. Thread the machine with your left hand while firmly gripping

inside the machine) by first passing the thread to the left

IMPORTANT:

To verify that the machine is threaded properly in the tension discs, do this simple check:

- 1.) With the presser foot raised and the needle unthreaded, pull the thread. You should detect only a slight resistance and little or no deflection of the needle.
- 2.) Now lower the presser foot and again pull the thread towards the the back of the machine. This time you should detect a considerable amount of resistance and much more deflection of the needle. If you do not detect the resistance, this means you have not threaded the machine correctly and need to rethread it.
