Modular Programming of Adaptive CAX Manufacturing Process Chains (E-Book) Gunter Spöcker, 2016-11-07 The manufacturing industry is undergoing major changes due to current trends like mass customization and Industrie 4.0. However today's CAX systems and approaches are not suitable to handle adaptive CAX process chains. To overcome this situation and to close the gaps between the existing CAX environment and the requirements for the manufacturing of the future a modular approach based on extended function blocks is presented. The proposed approach is verified based on the use case of a worn out BLIR segment by using repair features. *Machining Dynamics and Parameters Process Optimization* Gorka Urbicain, Daniel Olvera Trejo, 2021-03-19 As we move further into the 21st century despite the fact that new technologies have emerged machining remains the key operation to achieve high productivity and precision for high added value parts in several sectors but recent advances in computer applications should close the gap between simulations and industrial practices.
