Six Ways To Perform Economic Evaluation Of Projects Quick Course:

Six Ways to Perform Economic Evaluation of Projects A. Bhatia, 2014-12-14 This course discusses the money issues. The objective is that while engineers find it necessary to learn the basic accounting and business principles to communicate with accountants, few accountants are willing to learn the engineering details. The basic cost evaluation techniques presented in the course shall help engineers to think like MBAs and act like engineers. Installed costs and capital offsets are important economic parameters for evaluation of proposed investment. The concept of money having a time value is fundamental to understanding any economic or financial analysis. This 3-hour course provides basic fundamentals of cost evaluating that could be applied to any new retrofitting, expansion, and modification projects. The course is intended for use primarily by the managers, engineers, architects, scientists, auditors, campaigners, academics, equipment manufacturers, and designers. The course includes a multiple-choice quiz consisting of fifteen (15) questions at the end. Learning Objective: At the conclusion of this course, the student will: Understand the 6 fundamental methods of cost analysis: Payback Method, Return on Investment (ROI), Total life cycle cost, present value method, Savings investment ratio, benefit-cost ratio method, Net present Value (NPV), Internal rate of return (IRR). Be aware of commonly used financial terminology and concepts. Be able to judge and select the right project alternative.

The Economic Evaluation of Projects David G. Davies, 1996 World Bank Discussion Paper No. 329 Tests the hypothesis that appropriate joint management of transboundary fish stocks can help avoid overexploitation of these resources while increasing rents and benefits. Focusing on the industrial pelagic fisheries of northern Chile and southern Peru, the authors present various quantitative models for identifying industry characteristics and calculating benefits.
