Teach Math Like This, Not Like That Matthew L. Beyranevand, 2017-05-24 Teaching mathematics is one of the most difficult and important jobs that anyone can do Mathematics is a critical part of education and an essential building block for problem solving skills that are needed in the real world However many students struggle to learn and understand mathematical concepts and educators need to do everything possible to help our students learn This book focuses on four areas necessary to be an impactful teacher of mathematics Planning Pedagogy Assessment and Relationships For each of the ideas presented in the book a brief introduction will be shared and then two different perspectives will be detailed with examples The first is Not like This which is often the traditional way of teaching mathematics or the less effective approach The second perspective is Teach Like This which is my recommended approach based upon research and my own experience as a teacher math coordinator and graduate instructor of math education

Developing Assessment-Capable Visible Learners, Grades K-12 Nancy Frey, John Hattie, Douglas Fisher, 2018-01-11 When students know how to learn they are able to become their own teachers Nancy Frey Douglas Fisher and John Hattie Imagine students who describe their learning in these terms I know where I m going I have the tools I need for the journey and I monitor my own progress Now imagine the extraordinary difference this type of ownership makes in their progress over the course of a school year This illuminating book shows how to make this scenario an everyday reality With its foundation in principles introduced in the authors bestselling Visible Learning for Literacy this resource delves more deeply into the critical component of self assessment revealing the most effective types of assessment and how each can motivate students to higher levels of achievement

Mathematics Education at Highly Effective Schools That Serve the Poor Richard S. Kitchen, Julie DePree, Sylvia Celedón-Pattichis, Jonathan Brinkerhoff, 2017-09-25 This book presents research findings about school level and district level practices and successful strategies employed in mathematics education by highly effective schools that serve high poverty communities. It includes both the theory and practice of creating highly effective schools in these communities. In 2002 nine schools were selected in a national competition to participate in the Hewlett Packard High Achieving Grant Initiative. As part of this Initiative these schools participated in the research study this book reports. The study employed both qualitative and quantitative methodologies to examine school and classroom level factors that contributed to high achievement particularly in mathematics. The goals of the study were twofold: 1 to investigate the salient characteristics of the highly effective schools in which the research was conducted and 2 to explore participating teachers' conceptions and practices about mathematics curriculum, instruction, and assessment. The schools described have much to teach about creating powerful learning environments that empower all students to learn challenging mathematics. Given the pressures of the accountability measures of the No Child Left Behind legislation, this book is extremely timely for those seeking school models that serve high poverty communities and have demonstrated high performance on high stakes examinations and other assessments. *Mathematics Education at Highly Effective Schools That Serve the Poor: Strategies for Change* is particularly relevant for teacher educators, researchers, teachers, and graduate students in the fields of mathematics education and school policy and reform, and for school administrators and district coordinators of mathematics education.
