In November, the ILO published a study mapping out and analysing the global landscape of entrepreneurial ecosystems approaches implemented by different actors in the Global South. The study proposes an integrated framework to analyse and categorize different entrepreneurial ecosystems approaches and provide a first stock taking on the effectiveness and sustainability of these approaches, as well as on the existing gaps and potential improvement opportunities to help practitioners and development actors implement sustainable entrepreneurial ecosystems strategies. Utilizing the ILO's Inclusive Entrepreneurship Ecosystem Approach, the reports "Women and youth in Sarajevo entrepreneurship ecosystem" and "Women and youth in Banja Luka entrepreneurship ecosystem" examine the entrepreneurship ecosystems of Sarajevo and Banja Luka, focusing on the inclusion of women and young people. The objective is to propose actionable solutions that can enhance the functionality of the ecosystems, catering to the needs of emerging women and young entrepreneurs. Both reports are products of the "Local Development Strategies - EU4Business in Bosnia and Herzegovina" project, funded by the European Union Delegation to Bosnia and Herzegovina (EUD) and executed by the ILO, GIZ, and UNDP. **Mission Uruzgan** Robert Beeres, Jan van der Meulen, Joseph Soeters, Ad Vogelaar, 2012 I en række afhandlingene beskrives den hollandske ISAF styrkes indsats i Afghanistan fra 2001-2010. I en fire-årig periode fra 2006-2010 var det hollandske kontingent indsat i den afghanske provins Uruzgan og opnåede bemærkelsesværdige resultater. Sikkerhedssituationen blev forbedret, den økonomiske udvikling blev stabiliseret, ligesom den offentlige administration, uddannelsen af børn og sundhedsplejen m.v. blev forbedret. Efter 2010 er provinsen overtaget af amerikanske og australske tropper.

**Entrepreneurship Education and Training Programs around the World** Alexandria Valerio, Brent Parton, Alicia Robb, 2014-05-06 Entrepreneurship has attracted global interest for its potential to catalyze economic and social development. Research suggesting that certain entrepreneurial mindsets and skills can be learned has given rise to the field of entrepreneurship education and training (EET). Despite the growth of EET, global knowledge about these programs and their impact remains thin. In response, this study surveys the available literature and program evaluations to propose a Conceptual Framework for understanding the EET program landscape. The study finds that EET today consists of a heterogeneous mix of programs that can be broken into two groups: entrepreneurship education and entrepreneurship training. These programs target a range of participants: secondary and post-secondary education students as well as potential and practicing entrepreneurs. The outcomes measured by program evaluations are equally diverse but generally fall under the domains of entrepreneurial mindsets and capabilities, entrepreneurial status, and entrepreneurial performance. The dimensions of EET programs vary according to the particular target group. Programs targeting secondary education students focus on the development of foundational skills linked to entrepreneurship, while post-secondary education programs emphasize skills related to strategic business planning. Programs targeting potential entrepreneurs generally are embedded within broader support programs and tend to target vulnerable populations for whom employment alternatives may be limited. While programs serving practicing entrepreneurs focus on strengthening entrepreneurs' knowledge, skills, and business practices, which, while unlikely to transform an enterprise in the near term, may accrue benefits to entrepreneurs over time. The study also offers implications for policy and program implementation, emphasizing the importance of clarity about target groups and desired outcomes when making program choices and sound understanding of the extent to which publicly supported programs offer a broader public good and compare favorably to policy alternatives for supporting the targeted individuals as well as the overall economic and social objectives.
