Business Calculations and Statistics Simplified N. A. Saleemi,1991 **Kenya Books in Print** ,1997 **Innovations as Key to the Green Revolution in Africa** Andre Bationo,Boaz Waswa,Jeremiah M. Okeyo,Fredah Maina,Job Maguta Kihara,2011-08-30 Africa can achieve self sufficiency in food production through adoption of innovations in the agriculture sector Numerous soil fertility and crop production technologies have been generated through research however wide adoption has been low African farmers need better technologies more sustainable practices and fertilizers to improve and sustain their crop productivity and to prevent further degradation of agricultural lands The agricultural sector also needs to be supported by functional institutions and policies that will be able to respond to emerging challenges of globalization and climate change **Kenya National Bibliography** ,2015 *The African Book Publishing Record* ,1988 **Web Creation for Beginners** Mr. Ahtasham Khan,2014-09-26 This book is the ultimate guide for those who are passionate about building a website but have no clue that how to begin It not only contains recipes including HTML and CSS but also demonstrates how to put these building blocks together to build a meaningful construction Unlike other books it doesn t leave you stranded at the other end guessing what to do next but takes you to the final milestone *Mechanisms of Heart Failure* Pawan K. Singal,Ian M.C. Dixon,Robert E. Beamish,Naranjan S. Dhalla,2012-12-06 Mechanisms of Heart Failure is based on papers selected from poster presentations made at the International Conference on Heart Failure Winnipeg May 20 23 1994 Although the entire book is one continuous discussion of subcellular mechanisms of heart failure and its treatment the presentation has been divided into three sections the opening section on the subcellular basis of heart failure includes discussions of cytokines signal transduction metabolism extracellular matrix organ level changes and newer approaches to understanding the pathogenesis of heart failure The second section focuses on the pathophysiological aspects of cardiomyopathies and their treatment In the final section medical surgical and pharmacological approaches to the treatment of heart failure are discussed in clinical and animal laboratory settings *Money Laundering and Terrorism Financing in Global Financial Systems* Rafay, Abdul,2021-04-16 During the last few decades corrupt financial practices were increasingly being monitored in many countries around the globe The past few decades have been eventful for these issues Today tackling money laundering and terrorism financing are considered key issues in developed and developing countries alike Eradication of money laundering and terrorism financing through a holistic approach of awareness prevention and enforcement is a current need It has enabled the birth of new regulatory regimes based on strict compliance robust processes and technology One of the many problems with this is the lack of general awareness about all these issues among various stakeholders including researchers and practitioners Money Laundering and Terrorism Financing in Global Financial Systems deepens the discourse about money laundering terrorism financing and risk management in a modern day environment It provides a fascinating and invaluable guide for understanding the theory practice and cases of these topics Split into two sections the

first being money laundering and terrorism financing and the second being financial governance and risk management the chapters create comprehensive knowledge on these acts of crime in the financial industry by defining the crimes themselves the many challenges and impacts and potential solutions This book is ideal for government officials financial professionals policymakers academicians business professionals managers IT specialists researchers and students **Mathematical**

Reviews ,1995 **Canadiana** ,1973 **Anomaly Detection in Video Surveillance** Xiaochun Wang,2024-08-06 Anomaly detection in video surveillance stands at the core of numerous real world applications that have broad impact and generate significant academic and industrial value The key advantage of writing the book at this point in time is that the vast amount of work done by computer scientists over the last few decades has remained largely untouched by a formal book on the subject although these techniques significantly advance existing methods of image and video analysis and understanding by taking advantage of anomaly detection in the data mining community and visual analysis in the computer vision community The proposed book provides a comprehensive coverage of the advances in video based anomaly detection including topics such as the theories of anomaly detection and machine perception for the functional analysis of abnormal events in general the identification of abnormal behaviour and crowd abnormal behaviour in particular the current understanding of computer vision development and the application of this present understanding towards improving video based anomaly detection in theory and coding with OpenCV The book also provides a perspective on deep learning on human action recognition and behaviour analysis laying the groundwork for future advances in these areas Overall the chapters of this book have been carefully organized with extensive bibliographic notes attached to each chapter One of the goals is to provide the first systematic and comprehensive description of the range of data driven solutions currently being developed up to date for such purposes Another is to serve a dual purpose so that students and practitioners can use it as a textbook while researchers can use it as a reference book A final goal is to provide a comprehensive exposition of the topic of anomaly detection in video media from multiple points of view *Viruses and Viral Infections in Developing Countries* Snežana

Jovanović-Ćupić,Muhammad Abubakar,Ayse Emel Onal,Muhammad Kashif Saleemi,Ana Božović,Milena Krajnovic,2020-06-17 This book contains information on various virus families with the focus on viruses causing prevalent infections in parts of developing countries in Africa and Asia Viral proteins play an important role in their replication and infection potential and are the main candidates for antiviral therapy and vaccines While some antiviral vaccines are available for quite some time e g MMR there are regions in the world still struggling with some infections This is especially the problem in regions where the morbidity rate from viral infections among young children is high This situation requires urgent measures to put infections under control *Statistics Simplified and Self-taught* Stanley H.
