Recomposing Ecopoetics Lynn Keller, 2018-01-16 In the first book devoted exclusively to the ecopoetics of the twenty first century Lynn Keller examines poetry of what she terms the self conscious Anthropocene a period in which there is widespread awareness of the scale and severity of human effects on the planet Recomposing Ecopoetics analyzes work written since the year 2000 by thirteen North American poets including Evelyn Reilly Juliana Spahr Ed Roberson and Jena Osman all of whom push the bounds of literary convention as they seek forms and language adequate to complex environmental problems Drawing as often on linguistic experimentalism as on traditional literary resources these poets respond to environments transformed by people and take nature to be a far more inclusive and culturally imbricated category than conventional nature poetry does This interdisciplinary study not only brings cutting edge work in ecocriticism to bear on a diverse archive of contemporary environmental poetry it also offers the environmental humanities new ways to understand the cultural and affective dimensions of the Anthropocene

Design Added Value Ömer Akin, 2021-07-22 Design has intrinsic economic value To make this value tangible design features of buildings need to be explored measured and taken into account when initiating projects and financing their construction It is as calculable as the extrinsic value of a project However we need concepts strategies methods techniques and tools to do just

that The Value Based Design approach and Design Added Value D AV methodology in this book enables architects engineers contractors and owner clients of buildings to benefit from extraordinary design and construction features It explains the rationale and motivation for D AV methodology outlines and illustrates this methodology with examples provides complete and detailed examples of how the key analysis techniques work through historical case studies and describes specific methods used in application of the D AV methodology such as Bayesian statistics cost benefit analysis pairwise comparison techniques cognitive walkthroughs and optimization Re-Imagining the Avant-Garde Matthew Butcher,Luke C. Pearson,2019-07-10 The 1960s and 1970s avant garde has been likened to an architectural Big Bang such was the intensity of energy and ambition in which it exploded into the postwar world Marked out by architectural projects that redefined the discipline it remains just as influential today References to the likes of Archizoom Peter Eisenman John Hejduk and Superstudio abound Highly diverse the avant garde cannot be defined as a single strand or tendency It was divergent geographically reaching from Europe to North America and Japan and in its political formal and cultural preoccupations It was unified though as a critical and experimental force critiquing contemporary society against the backdrop of extreme social and political upheaval the Paris riots of May 1968 the anti Vietnam war movement in America and the looming ecological crisis Re imagining the Avant garde outlines how in contemporary architectural practice avant garde projects retain their power as historical precedents as barometers of a particular design ethos as critiques of society and instigators of new formal techniques Given the far reaching impact of the subsequent digital revolution which has since reshaped every aspect of practice the issue asks why this historical period continues to retain its undeniable grip on current architecture Contributors Pablo Bronstein and Sam Jacob Sarah Deyong Stylianos Giamarelos Damjan Jovanovic Andrew Kovacs Perry Kulper Igor Marjanovic William Menking Michael Sorkin Neil Spiller and Mimi Zeiger Featured architects Archizoom Andrea Branzi Jimenez Lai Luis Miguel Koldo Lus Arana Klaus NEMESTUDIO Superstudio and UrbanLab **Junk Jet n°3** Asli Serbest,2010 **Real Estate Law Digest** James A.
