

1. **Identify the problem.** The first step is to identify the problem. This involves understanding the symptoms and the context in which they are occurring.

2. **Define the problem.** Once the problem is identified, it needs to be defined. This involves stating the problem in clear, concise terms.

3. **Set priorities.** After defining the problem, the next step is to set priorities. This involves determining which aspects of the problem are most urgent and which can wait.

4. **Develop a plan.** The fourth step is to develop a plan. This involves outlining the steps that need to be taken to solve the problem.

5. **Implement the plan.** The fifth step is to implement the plan. This involves putting the plan into action and monitoring progress.

6. **Evaluate the results.** The final step is to evaluate the results. This involves assessing whether the problem has been solved and whether the solution was effective.
