Only in New Orleans Luis Mirón,Brian R. Beabout,Joseph L. Boselovic,2015-07-22 With 2015 marking the 10th
commemoration of Hurricane Katrina education reform in New Orleans continues to garner substantial local national and
international attention Advocates and critics alike have continued to cite test scores new school providers and different
theories of governance in making multiple arguments for and against how contemporary education policy is shaping public
education and its role in the rebuilding of the city Rather than trying to provide a single unified account of education reform
in New Orleans the chapters in this volume provide multiple ways of approaching some of the most significant questions
around school choice and educational equity that have arisen in the years since Katrina This collection of research articles
essays and journalistic accounts of education reform in New Orleans collectively argues that the extreme makeover of the
city s public schools toward a new market based model was shaped by many local historically specific conditions In
consequence while the city s schools have been both heralded as a model for other cities and derided as a lesson in the limits
of market based reform the experience of education reform that has taken place in the city and its impacts on the lives of
students families and educators could have happened only in New Orleans The Clinical Practice of Educational Therapy
Maxine Ficksman,Jane Utley Adelizzi,2013-05-13 The Clinical Practice of Educational Therapy is the first book to provide a
comprehensive review of the interdisciplinary profession and practice of educational therapy as it exists today It describes
the scope and practice of educational therapy from its European roots to its growing presence in the United States and
provides case studies to illustrate the work of educational therapists Key Features Interdisciplinary Perspective Other books

focus on either educational or therapeutic interventions but rarely discuss the blend and synergy of disciplines that are the hallmark of the profession Illustrative Cases The text draws heavily on case studies as a means of understanding the practice of educational therapy especially the relationship between therapist and client Expertise Chapter authors are either experienced educational therapists or allied professionals who have made scholarly contributions to the profession such as Dorothy Ungerleider Patricia Waters Roslyn Arnold and George McCloskey In addition to educational therapy students and practitioners this book is appropriate for those working in related fields including special education school psychology school counseling and social work in educational settings

The Primal Teen Barbara Strauch,2007-12-18 A groundbreaking look at the teenage brain for anyone who has puzzled over the mysterious and often infuriating behavior of a teenager While many members of the scientific community have long held that the growing pains of adolescence are primarily psychological Barbara Strauch highlights the physical nature of the transformation offering parents and educators a new perspective on erratic teenage behavior Using plain language Strauch draws upon the latest scientific discoveries to make the case that the changes the brain goes through during adolescence are as dramatic and crucial as those that take place in the first two years of life and that teenagers are not entirely responsible for their sullen rebellious and moody ways Featuring interviews with scientists teenagers parents and teachers The Primal Teen explores common challenges why teens go from articulate and mature one day to morose and unreachable the next why they engage in risky behavior and offers practical strategies to help manage these formative and often difficult years
