Sierra Leone Questions And Answers On Weac:

The Diverse Facets of Corruption in Sierra Leone Emmanuel Saffa Abdulai, Ina Kubbe, 2024-07-15 This edited volume delves into Sierra Leone's complex post conflict landscape. It posits that the nation's path to peace and stability hinges on robust anticorruption measures. The chapters explore Sierra Leoneans' unique perception of corruption reflecting its political, economic, legal, and socio-cultural dimensions. Moving away from mere theoretical abstraction, the book pulls together fascinating practical discussions on the success and challenges of anti corruption tools used in Sierra Leone. Approaches used to explain corruption in this postwar fragile democratic country include issues like non conviction based asset recovery and how it works, unexplained wealth, exposes lifestyle offences, accountability of the judiciary and how judicial institutions can become a predator, the role of the media in the fight against corruption, the part of culture and history in engraining corruption, patrimonialism as an explanation of corruption, and social norms and sociological exposition to explain corruption.

School Science Practical Work in Africa Umesh Ramnarain, 2020-06-01 School Science Practical Work in Africa presents the scope of research and practice of science practical work in African schools. It brings together prominent science educators and researchers from Africa to share their experience and findings on pedagogical innovations and research informed practices on school science practical work. The book highlights trends and patterns in the enactment and role of practical work across African countries. Practical work is regarded as intrinsic to science teaching and learning, and the form of practical work that is strongly advocated is inquiry based learning, which signals a definite paradigm shift from the traditional teacher dominated to a learner centered approach. The book provides empirical research on approaches to practical work, contextual factors in the enactment of practical work, and professional development in teaching practical work. This book will be of great interest to academics, researchers, and post graduate students in the fields of science education and educational policy.

Tradition, Modernity and Post-modernity in Comparative Education Vandra

Masemann, Anthony Welch, 1998-01-31 This special double issue consists of a selection of papers presented at the Ninth World Congress of Comparative Education held at the University of Sydney, Australia, in July 1996, on the theme of Tradition, Modernity, and Post-modernity in Comparative Education. Before presenting the selection, this introduction will first survey the changing discourse in comparative education over the past few decades and will argue that an unreformulated and uncritical postmodernity holds no greater promise in comparative education than its uncritical modernist or tradition.

oriented rivals When Nicholas Hans 1949 cited Michael Sadler's early rationale for studying comparative education it was within the context of a work which sought to identify the traditions that underlay national educational systems This early work together with others such as that by Isaac Kandel 1930 was predicated on the assumption of the importance of national character of which education systems were an important component Indeed from this perspective the purpose of comparative education was not merely to analyse the forces and factors which produced differences among educational systems but implicitly at least also to discover the underlying principles which govern the development of all national systems of education Hans 1949 5 Hans was preeminently an historian of course as was Kandel to an extent and therefore saw comparative education first and foremost in this light **The Nigerian Geographical Journal** ,1963 *Educational*

Research: a Beginner's Guide Allyson Sesay,2012-01-04 This book presents a rudimentary exposure to the field of educational research and an attempt to allay the unwarranted fear of those who perceive research as a highly technical and complex scholarly activity carried out by persons in the sciences The author takes the position that anyone can do research and that it can be an interesting and very worthwhile experience Educational research particularly action research which the author emphasizes is an invaluable exercise about which everyone in education should be knowledgeable or at least be familiar Starting with an explication of some salient concepts in the study of research e g research educational research research problem v research topic hypothesis experimental v non experimental research the book takes the reader through the process of conducting a research problem from problem selection and statement significance review of literature methodology data analysis findings to recommendations and conclusions Detailed descriptions of the American Psychological Association APA style of referencing with ample examples are provided The book is written in simple language so that even high school students will be able to acquire a fairly good understanding of each contents Though the primary target population is undergraduate students of education the contents are broad enough to provide a guide for students in other disciplines as well as whet the appetite of the general reader who seeks only a basic knowledge of research and or educational research **National Assembly Debates** Nigeria.
