Metaphor Eva Feder Kittay, 1990 This book provides a comprehensive philosophical theory explicating the cognitive contribution of metaphor Metaphor effects a transference of meaning not between two terms but between two structured domains of content or semantic fields Semantic fields construed as necessary to a theory of word meaning provide the contrastive and affinitive relations that govern a term s literal use In a metaphoric use these relations are projected into a second domain which is thereby reordered with significant cognitive effects The book is a detailed revision and refinement of the semantic theory of metaphor Taking into account pragmatic considerations and recent linguistic and psychological studies the author forges a new understanding of the relation between metaphoric and literal meaning She amply illustrates her thesis with sensitive and systematic analyses of metaphors found in literature philosophy science and everyday language

[Linguistic Perspectives on the Construction of Meaning and Knowledge](#) Elke Diedrichsen, Brian Nolan, 2019-09-24 This book is an exploration of the dimensions of meaning in language from several important perspectives that are of major interest to scholars today bringing together studies from the realms of linguistic pragmatics semantics ontological knowledge engineering and computational linguistics Situated within modern functional cognitive constructional ontological and computational paradigms the analyses here are supported by authentic

language data including corpus data from a rich set of languages Context and situation play an important but complex role in meaning elaboration The role of context and situation is elusive and has proved difficult to elucidate with respect to meaning and knowledge representation This volume provides evidence of the nature of the often rapid emergence of meaning in the digital world of the internet social media and Internet memes The use of computational avatars and the rise of human language technologies including big data and digital corpora have made the construction of meaning and human language understanding essential to the work of linguists cognitive scientists and computer scientists who are increasingly working together in collaborative teams to share insights
