context of the colonial urban project was first imagined and tested through the physical segregation of the colonial prison. It relates the story of a city, Singapore, and a contemporary city state whose plural society has its origins in these historical divisions. A description of the evolution of the ideal plan for a plural city across the three settlements is followed by a detailed look at Singapore's colonial prison. Chapters trace the prison's development and its dissolution across the urban landscape through the penal labor system. The author demonstrates the way in which racial politics were inscribed spatially in the division of penal facilities and how the map of the city was reconfigured through convict labor. Later chapters describe penal resistance first through intimate stories of penal life and then through a discussion of organized resistance in festival riots. Eventually the plural city ideal collapsed into the hegemonic urban form of the citadel where a quite different military vision of the city became evident. *Hidden Hands and Divided Landscapes* is a fascinating and thoroughly original study in urban history and the making of multiethnic society in Singapore. It will compel readers to rethink the ways in which colonial urban history, postcolonial urbanism, and governance have been theorized by scholars and represented by governments.
