Geological Atlas of Africa Thomas Schlüter, 2008-04-19 This atlas is intended primarily for anybody who is in some background for the arrangement of how the interested in basic geology of Africa. Its originality lies in that the atlas was done. The second chapter is devoted to the fact that the regional geology of each African history of geological mapping in Africa necessary nation or territory is reviewed country-wise by maps for a fuller appreciation of why this work in Africa is and text a view normally not presented in textbooks worth doing. Chapter 3 provides an executive summary of regional geology. It is my belief that there has long been a need in universities and geological surveys worldwide in the context of no political boundaries both in Africa and in the developed world for summary. The main part of the atlas lies in Chapter 4 where, in summarizing geological maps and an accompanying basic alphabetical order, each African country or territory text utilising the enormous fund of knowledge that is presented by a digitized geological overview map has been accumulated since the beginning of geological and an accompanying text on its respective stratigraphical research in Africa in the mid 19th century. I hope that tectonics, economic geology, geohazards, and that in part the present atlas may satisfy this need. Geosites. A short list of relevant references is also added.

New Orleans Under Reconstruction Carol M. Reese, Michael Sorkin, Anthony Fontenot, 2014-07-08 When the levees broke in August 2005 as a result of Hurricane Katrina, 80 percent of the city of New Orleans was flooded, with a loss of 134,000 homes and 986 lives. In particular, the devastation hit the vulnerable communities the hardest: the old, the poor, and the African American. The disaster exposed the hideous inequality of the city. In response to the disaster, numerous plans, designs, and projects were proposed. This bold, challenging, and informed book gathers together the variety of responses from politicians, writers, architects, and planners and searches for the answers to one of the most important issues of our age: How can we plan for the future, creating a more robust and equal place?
