Turkish Intelligence and the Cold War Egemen Bezci, 2019-10-31 Turkish Intelligence and the Cold War examines the hitherto unexplored history of secret intelligence cooperation between three asymmetric partners specifically the UK US and Turkey from the end of the Second World War until the Turkey's first military coup d'état on 27 May 1960 The book shows that our understanding of the Cold

War as a binary rivalry between the two blocs is too simple an approach and obscures important characteristics of intelligence cooperation among allies Egemen Bezci shows that a pragmatic approach offers states new opportunities to protect national interests by conducting intelligence diplomacy to influence crucial areas such as nuclear weapons and to exploit cooperation in support of their own strategic imperatives This study not only reveals previously unexplored origins of secret intelligence cooperation between Turkey and West but also contributes to wider academic debates on the nature of the Cold War by highlighting the potential agency of weaker states in the Western Alliance *Intelligence and Government in Britain and the United States* Philip H.J. Democratic Oversight of Intelligence Services Daniel Baldino, 2010 This book addresses the development and the challenges and impediments to democratic oversight and review of the intelligence community in Australia Japan Canada New Zealand the US and UK The promotion of democratic oversight of the intelligence community has gained renewed significance in the aftermath of 9 11 **Studies in Intelligence**, 2010 **The End of Intelligence** David

Tucker, 2014-08-20 Using espionage as a test case The End of Intelligence criticizes claims that the recent information revolution has weakened the state revolutionized warfare and changed the balance of power between states and non state actors and it assesses the potential for realizing any hopes we might have for reforming intelligence and espionage Examining espionage counterintelligence and covert action the book argues that contrary to prevailing views the information revolution is increasing the power of states relative to non state actors and threatening privacy more than secrecy Arguing that intelligence organizations may be taken as the paradigmatic organizations of the information age author David Tucker shows the limits of information gathering and analysis even in these organizations where failures at self knowledge point to broader limits on human knowledge even in our supposed age of transparency He argues that in this complex context both intuitive judgment and morality remain as important as ever and undervalued by those arguing for the transformative effects of information This book will challenge what we think we know about the power of information and the state and about the likely twenty first century fate of secrecy and privacy **The Intelligence State in Tunisia** Omar Safi, 2020-05-14 For most Arab regimes intelligence security apparatus and the secret services are central to their domestic politics Yet despite

this very little scholarly attention has been paid to the relationship between intelligence and politics in any Arab state This book examines how security apparatus and intelligence influenced the domestic politics of Tunisia from the implementation of French Protectorate in 1881 to the aftermath of the independence up to 1965 Based on unprecedented access to the sources of the Ministry of Interior and the First Ministry during Bourguiba s regime as well as the national diplomatic and military archives of France Italy and the United Kingdom the book is the first to trace the evolution of the Tunisian security community Omar Safi argues that from an apparatus designed to maintain colonial control intelligence became an instrument to drive the political agendas of the ruling elite The book sheds new light on the influence of intelligence presenting it as the fundamental and generally ignored missing dimension of North African domestic politics
