Similarities Between Skimming And Scanning:

Thinking Through New Literacies for Primary and Early Years Jayne Metcalfe, Debbie Simpson, Ian Todd, Mike Toyn, 2013-06-17 Thinking Through New Literacies for Primary and Early Years is an accessible text that encourages readers to consider deeply what is meant by literacy today. It explores the many different ways in which teachers and children develop their own literacy. Specifically written for education students in the later years of their course, the text draws on research and practice to explore the challenges and opportunities involved while helping to develop the reader's own critical thinking skills. The book begins by asking what's new about new literacies and goes on to explore some technological innovations designed to support the emergent reader and writer. It considers verbal literacy (speaking and listening) and visual literacy. Readers are encouraged to think through the issues surrounding inclusion and the legal and ethical issues raised by this post-typographic age. Throughout, practical guidance runs alongside structured critical thinking exercises to help the reader reflect on both theory and practice.

About the Thinking Through Education Series: Thinking Through Education is a series of texts designed and written specifically for those education students entering the second or final phase of their degree course. Structured around sets of specific skills, each chapter uses critical thinking and reflective exercises to develop greater subject knowledge and critical awareness. Each book contains links to the Teachers' Standards, providing students with a clear transition from study to practice.

Jayne Metcalfe is a senior lecturer in the Faculty of Education at the University of Cumbria. Jayne is involved in the safety training of student teachers.
