Taking Care Of Youth And The Generations:

Taking Care of Youth and the Generations Bernard Stiegler, 2010 The book presents a powerful reminder of adults responsibility for the development of long term attention and thus of maturity in children particularly in the face of the techniques of attention destruction practiced by the programming industries Bernard Stiegler Bart Buseyne, Georgios Tsagdis, Paul Willemarck, 2024-01-25 Honouring the memory of the late Bernard Stiegler this edited collection presents a broad spectrum of contributions that provide a complex and coherently articulated image of Stiegler's thought which reached beyond the boundaries of academic artistic and experimental techno scientific enclaves where it had been originally received Stiegler's philosophical work encompassed theorization social diagnosis planning practical and territorial experimentation politics and aesthetics In its wake the essays in this volume celebrate and explore the wealth of this multi dimensional legacy They examine the conditions of human life in general its foundational intermittence and carry forward Stiegler's post phenomenological unfolding of the distinctive spatio temporalities that weave together the epoch we call present Engaging closely with Stiegler's original impetus for the creation of technologies of care as well as of communities of knowledge and artistic practice **Feminism, Digital Culture and the Politics of Transmission** Deborah Withers, 2015-10-02 Feminism Digital Culture and the Politics of Transmission argues that despite the prevalence of generational narratives within feminism the technical processes through which knowledge is transmitted across generations remain unexplored Taking Bernard Stiegler's concept of the already there as its starting point the book considers how the politics of transmission operates within digital culture It argues that it is necessary to re orient feminism's political project within what is already there so that it may respond to an emergent feminist tradition Grounded in the author's work collecting and interpreting the music making heritage of the UK Women's Liberation Movement it explores how digital technologies have enabled impassioned amateurs to make archives within the first decade of the 21st century The book reflects on what is technically and politically at stake in the organization and transmission of digital artifacts and explores what happens to feminist cultural heritage when circuits shut down stall or become diverted The Assemblage Brain Tony D. Sampson, 2016-12-13 Once upon a time neuroscience was born A dazzling array of neurotechnologies emerged that according to popular belief have finally begun to unlock the secrets of the brain But as the brain sciences now extend into all corners of cultural social political and economic life a yet newer world has taken shape neuroculture which goes further than ever before to tackle the profound ethical implications we face in consequence The Assemblage Brain unveils a major new concept of sense making one that challenges conventional scientific and philosophical understandings of the brain Drawing on Deleuze and Guattari Tony D Sampson calls for a radical critical theory that operates in the interferences between philosophy science art and politics From this novel perspective the book is structured around two questions What can be done to a brain and What can a brain do Sampson examines the rise of neuroeconomics in informing significant developments in computer work marketing and the neuropharmaceutical control of

inattentiveness in the classroom Moving beyond the neurocapitalist framework he then reestablishes a place for proto subjectivity in which biological and cultural distinctions are reintegrated in an understanding of the brain as an assemblage The Assemblage Brain unravels the conventional image of thought that underpins many scientific and philosophical accounts of how sense is produced providing a new view of our current time in which capitalism and the neurosciences endeavor to colonize the brain

The Past is the Present; It's the Future Too Christine Ross,2012-06-28 The term temporality often refers to the traditional mode of the way time is a linear procession of past present and future As philosophers will note this is not always the case Christine Ross builds on current philosophical and theoretical examinations of time and applies them to the field of contemporary art films video installations sculpture and performance works Ross first provides an interdisciplinary overview of contemporary studies on time focusing on findings in philosophy psychology sociology communications history postcolonial studies and ecology She then illustrates how contemporary artistic practices play around with what we consider linear time Engaging the work of artists such as Guido van der Werve Melik Ohanian Harun Farocki and Stan Douglas allows investigation though the art as opposed to having art taking an ancillary role The Past is the Present It's the Future Too forces the reader to understand the complexities of the significance of temporal development in new artistic practices

Foschia, 2022-09-23 *Plasticity in Motion* Sport Gender and Biopolitics argues that sport has a transformative power that when engaged with habitually can create bodies with the athletic ability to succeed at the incredible performances that captivate modern sports audiences Robert M Foschia draws heavily from the influential and extensive work of Catherine Malabou on plasticity the ability to shape and form and similarly argues that transformation is not always positive or infinite with the potential for accidents injuries and excommunications However sport as a discursive space often precludes any mention of these negative transformations asserting itself as pure potential and becoming often to the exclusion of the feminine What occurs if the feminine enters into this space Foschia intentionally integrates the feminine back into hypermasculine discussions of sport opening a new realm of possible transformations to the ways we play watch and think about sports Scholars of communication media studies gender studies rhetoric and sports will find this book particularly useful

excellence of the Enlightenment the education system and universities Through a powerful critique of thinkers from Marx to Derrida Stiegler develops new conceptual weapons to fight this destruction He argues that schools and universities must themselves be transformed new educational institutions must be developed both to take account of the dangers of digitization and the internet and to enable us to take advantage of the new opportunities they make available **Getting HIV-Positive**
