- Expressions
- Equations
- Creating solving expressions with whole number exponents
- Creating solving expressions based on written descriptions
- Creating equivalent expressions
- Identifying equivalent expressions
- Creating expressions using variables to represent unknown numbers in word problems
- Solving equations/inequalities
- Using variables to write solve equations for real world situations
- Writing inequalities to represent real life situations
- Determining relationships between variables in order to solve word problems
- Geometry
- Finding the area of polygons
- Finding the area of right rectangular prisms
- Drawing polygons in a coordinate plane
- Using 2d nets to represent 3d shapes
- find surface area
- The Number System
- Dividing fractions
- Multiplying multi-digit numbers
- Adding subtracting multiplying dividing decimals
- Finding greatest common factors and least common multiples
- Using positive/negative numbers to represent opposite values or directions
- Rational numbers as part of the number line
- Ordering absolute value of positive/negative numbers
- Finding the distance between 2 points on a coordinate plane
- Ratios/Proportions
- Understanding ratios using them to describe relationships
- Using unit rates to describe relationships between 2 quantities
- Using ratios to solve real world problems
- Statistics/Probability
- Identifying/creating statistical questions
- Describing the distribution of data with center/spread or overall shape
- Describing the distribution of data with measures of center and measures of variability
- Recognizing/generating graphs to represent statistical data
- Summarizing data sets in relation to the question asked

Educators' Learning from Lesson Study Akihiko Takahashi, Thomas

McDougal, Shelley Friedkin, Tad Watanabe, 2022-06-30 Offering voices from the field the first of its kind outside of Japan this guide to teaching and learning elementary mathematics highlights real case examples from teachers and educators who share what they have learned through Lesson Study The teachers reports provide vivid examples of new insights and ideas about mathematics about pedagogy and lesson design about student learning and about professional collaboration gained through Lesson Study Each report includes an abbreviated plan of the specific research lesson that led to the new insights which readers can draw from to replicate the powerful learning in their own community The case examples of this book are from Lesson Study in mathematics elementary to lower secondary grade levels focused on what teachers and educators have learned about improving mathematics teaching and learning but many ideas from each report can be applied to other subjects and different grade levels This unique book will be an excellent resource for mathematics teachers in training and practice who seek to improve mathematics teaching and learning in their own and others classrooms including researchers and school administrators who lead professional development
