Freeman, 1900 **Proceedings**, 2003 The Films of Fritz Lang Tom Gunning, 2019-07-25 In this volume Tom Gunning examines the films of Fritz Lang not only as a stylistically coherent body of work but as an attempt to portray the modern world through cinema The world of modernity in which systems replace individuals is conveyed by Lang s mastery of cinematic set design composition and editing Lang presents not only a decades long vision of cinematic narrative which can be compared to that of Alfred Hitchcock or Jean Renoir but a view of modernity that relates strongly to the ideas of Adorno Brecht Benjamin and Kracauer From the sweeping allegorical films of the 20s to the chilly and abstract thrillers of the 50s Lang s films Gunning claims are among the most precious records of the twentieth century The Films of Fritz Lang immeasurably enriches our understanding of a great artist and in so doing reimagines what a film artist is an author who fades away even in being recognised and interpreted an enigmatic figure at the junction of aesthetics history biography and theory *Scientific and Technical Aerospace Reports*, 1971 **Tectonic Evolution, Collision, and Seismicity of**

Engineers,2000 **Investigations in Sanday, Orkney** Stephen J. Dockrill,2007 Tofts Ness is a peninsula at the north end of the Orcadian island of Sanday where mounds and banks represent a domestic landscape marginal even in island terms together with a funerary landscape A combination of selective excavation and geophysical survey during 1985-8 revealed settlement and cultivation spanning Neolithic to Early Iron Age times including burnt mounds and traces of plough cultivation The Neolithic inhabitants of Tofts Ness appear not to have used either Grooved Ware or Unstan Ware and it is suggested that this reflects a lack of status compared to the settlement at Pool Instead the pottery shares important links to contemporary assemblages from West Mainland Shetland and this is echoed by the steatite artefacts The link with Shetland remains visible into the Late Bronze Age The upper levels of the main settlement mound contained the remains of stone built roundhouses of the Late Bronze Age and Early Iron Age of which the last survived to a height of 1.5m A lack of personal items amongst the artefact assemblage again indicates the low status of the inhabitants The economic evidence for all periods shows a mixed subsistence economy based on animal husbandry and barley cultivation together with fishing fowling and the exploitation of wild plants both terrestrial and marine Important studies on the farming methods employed on Tofts Ness reveal a manuring strategy in managing small fields that was more akin to intensive gardening than field cultivation and a deliberate policy of harvesting the barley crop whilst under ripe
