Wiring Essentials Cowles Creative Publishing, Black & Decker Corporation (Towson, Md.), 1996 Gives clear concise instructions for basic home wiring repairs and explains in detail how to install wall switches replace receptacles repair light fixtures and much more **Building a Home Security System with Raspberry Pi** Matthew Poole, 2015-12-28 Build your own sophisticated modular home security system using the popular Raspberry Pi board About This Book This book guides you through building a complete home security system with Raspberry Pi and helps you remotely access it from a mobile device over the Internet It covers the fundamentals of interfacing sensors and cameras with the Raspberry Pi so that you can connect it to the outside world It follows a modular approach so that you can choose the modules and features you want for

your customized home security system

Who This Book Is For This book is for anyone who is interested in building a modular home security system from scratch using a Raspberry Pi board basic electronics sensors and simple scripts This book is ideal for enthusiastic novice programmers electronics hobbyists and engineering professionals It would be great if you have some basic soldering skills in order to build some of the interface modules

What You Will Learn Understand the concepts behind alarm systems and intrusion detection devices Connect sensors and devices to the on board digital GPIO ports safely Monitor and control connected devices easily using Bash shell scripting Build an I O port expander using the I2C bus and connect sensors and anti tamper circuits Capture and store images using motion detectors and cameras Access and manage your system remotely from your mobile phone Receive intrusion alerts and images through your e mail Build a sophisticated multi zone alarm system

In Detail The Raspberry Pi is a powerful low cost credit card sized computer which lends itself perfectly as the controller for a sophisticated home security system Using the on board interfaces available the Raspberry Pi can be expanded to allow the connection of a virtually infinite number of security sensors and devices The Raspberry Pi has the processing power and interfaces available to build a sophisticated home security system but at a fraction of the cost of commercially available systems

Building a Home Security System with Raspberry Pi starts off by showing you the Raspberry Pi and how to set up the Linux based operating system It then guides you through connecting switch sensors and LEDs to the native GPIO connector safely and how to access them using simple Bash scripts As you dive further in you ll learn how to build an input output expansion board using the I2C interface and power supply allowing the connection of the large number of sensors needed for a typical home security setup In the later chapters of the book we ll look at more sophisticated topics such as adding cameras remotely accessing the system using your mobile phone receiving intrusion alerts and images by e mail and more By the end of the book you will be well versed with the use of Raspberry Pi to power a home based security system that sends message alerts whenever it is triggered and will be able to build a truly sophisticated and modular home security system You will also gain a good understanding of Raspberry Pi s ecosystem and be able to write the functions required for a security system

Style and approach This easy to follow guide comprises a series of projects where every chapter introduces a new concept and at the end of the book all these concepts are brought together to create an entire home security system This book features clear diagrams and code every step of the way
