**Logic and Humour in the Fabliaux** Roy Percy, 2007 A theoretically defensible inventory of the fabliaux based on a new structural definition Joseph B dier s 1893 definition of the fabliaux as funny stories in verse is still widely accepted as the best brief and general description for a heterogeneous collection of texts But the heterogeneity creates difficulties and at the periphery of the canon all three of the criteria included in B dier s definition are open to question The inventory proposed in the current study is based on a new structural definition a conjointure akin to that of romance combining a logical episteme with a rhetorical narreme The episteme features a contradictory taken from Boolean algebra and assumes four different forms depending on whether ambiguity resulting from the contradictory is understood by neither by both or by either the sender or the receiver of a message In the first two instances a character foreign to the episteme intervenes to resolve confusion in the narreme or appears as the victim of the sophistical assumption of a contrary to fact reality in the latter instances the sender or the receiver of the message in the episteme triumphs in the narreme The resulting inventory including and augmenting the texts admitted by Per Nykrog and discarding numerous stories already challenged for authenticity is theoretically defensible to a degree not previously achieved ROY PEARCY is an Honorary Research Fellow of the University of London

***Tales for Shakespeare*** Thomas G. Olsen, 2020-03-10 Suitable for students researchers thespians and general readers Tales for Shakespeare is an anthology of source stories behind seven of Shakespeare s most beloved frequently studied and regularly performed plays It begins with a general introduction examining Shakespeare s creative process and the assumptions about creativity shared by writers and readers of his age It asks whether or not Shakespeare was a plagiarist before showing how even posing this question requires extensive historical and critical framing The full texts of seven primary source stories are then presented all in modern spelling and punctuation with glosses and notes Each story is preceded by a concise introduction which like the general introduction is written for students and a range of other readers The volume includes questions for each text a general glossary and a list of recommended further reading A new translation of a source story for The Merchant of Venice is also included

**The White People and Other Weird Stories** Arthur Machen, 2011-09-27 Classic tales of the fantastic creepy and weird with a foreword from the award winning director of The Shape of Water Guillermo Del Toro Machen s weird tales of the creepy and fantastic finally come to Penguin Classics With an introduction from S T Joshi editor of American Supernatural Tales The White People and Other Weird Stories is the perfect introduction to the father of weird fiction The title story The White People is an exercise in the bizarre leaving the reader disoriented and on edge From the first page Machen turns even fundamental truths upside down as his character Ambrose explains there have been those who have sounded the very depths of sin who all their lives have never done an ill deed setting the stage for a tale entirely without logic For more than seventy years Penguin has been the leading publisher of classic literature in the English speaking world With more than 1 700 titles Penguin Classics represents a global bookshelf of

*The Visible Text* Thomas A. Bredehoft,2014-01-16 Oxford Textual Perspectives is a new series of informative and provocative studies focused upon literary texts conceived of in the broadest sense of that term and the technologies cultures and communities that produce inform and receive them It provides fresh interpretations of fundamental works and of the vital and challenging issues emerging in English literary studies By engaging with the materiality of the literary text its production and reception history and frequently testing and exploring the boundaries of the notion of text itself the volumes in the series question familiar frameworks and provide innovative interpretations of both canonical and less well known works Covering materials ranging from Anglo Saxon manuscripts and inscribed objects to contemporary comics The Visible Text rewrites the history of textual media and technologies Arguing that media are not defined by technologies alone but by a combination of technologies and the ideas that people hold about those technologies Bredehoft identifies four distinct periods or domains in the history of English literature that correspond to four ways in which media ideologies interacted with the two basic defining technologies of manuscripts and printed books Examining two complementary ways of defining texts as

subject to a reproductive medium on the one hand and as surrounded and defined by paratexts on the other The Visible Text points out how Anglo Saxon manuscripts and contemporary comics share a remarkable similarity in being structured as productions rather than reproductions Contrastingly the late medieval and print era periods share a cultural investment in textual reproduction but they differ both in their characteristic technologies and in how they conceptualize the object of reproduction itself A final epilogue briefly considering the nature of electronically mediated textuality highlights the importance of understanding the history addressed here as electronic text both parallels and departs from typographic print in ways that earlier reproductive domains clarify and complicate Filled with concrete examples of both books and texts The Visible Text will be of interest to readers in the fields of literature book history literary theory media studies and visual culture
