to all three volumes of Karl Marx's Capital with advice on further reading and points for further discussion Recognizing the
contemporary relevance of Capital in the midst of the current financial crisis Kenneth Smith has produced an essential guide
to Marx's ideas particularly on the subject of the circulation of money capital This guide uniquely presents the three volumes
of Capital in a different order of reading to that in which they were published placing them instead in the order that Marx
himself sometimes recommended as a more user friendly way of reading Dr Smith also argues that for most of the twentieth
century the full development of the capitalist mode of production CMP has been undermined by the existence of a non
capitalist third world which has caused the CMP to take on the form of what Marx called a highly developed mercantile
system rather than one characterized by an uninterrupted circuit of industrial capital of the kind he expected would develop
While the guide can be read as a book in its own right it also contains detailed references to Volumes I III so that students
seminars and discussion groups can easily make connections between Smith's explanations and the relevant parts of Capital
