Our Navy, the Standard Publication of the U.S. Navy, 1909 **When the Body Is the Target** Sharon Klayman Farber, 2002-11-05 In this comprehensive and insightful work Dr Sharon K Farber provides an invaluable resource for the mental health professional who is struggling to understand self harm and its origins Using attachment theory to explain how addictive connections to pain and suffering develop she discusses various kinds and functions of self harm behavior From eating disorders to body modifications such as tattooing Dr Farber explores the language of self harm and the translation of that language and its psychic functions in the therapeutic setting She tells us When the body weeps tears of blood we need to wonder what terrible sorrows cannot be spoken Brilliantly illustrated with rich clinical material this book offers a practical approach to the diagnosis assessment and treatment of the increasing number of patients whose emotions are expressed through bodily harm The challenges of working with patients who tend to view the world of relationships in terms of predator and prey are clearly explicated and the stormy countertransference responses that threaten to destroy the treatment are given a full hearing Finally she shows how the attachment relationship formed in treatment can repair the traumatic attachment in mind body psyche and soul and can serve as the cornerstone of therapeutic change A Jason Aronson Book

Between Emotion and Cognition Joseph Newirth, 2005-09-17 Modern individuals often enter analysis because of a feeling of hollowness a deadened absence of aliveness meaninglessness and a sense of being alone in a world that seems otherwise exciting engaging and alive Joseph Newirth believes that these feelings reflect a disease of modern man which can be traced to a failure in the development of subjectivity Through a careful reading of theory and well reasoned presentations of case material Newirth vividly evokes the contemporary dilemma of the individual's lack of subjectivity Newirth positions this lack of subjectivity as a failure in the development of the unconscious an understanding that provides the foundation for the development of a two person theory of the unconscious Newirth proposes a Neo Kleinian model of the unconscious the generative unconscious in contrast to the repressed unconscious of classical theory or the relational unconscious of interpersonal and relational theory He defines the generative unconscious as a source of creativity of apprehending and generating experience in terms of emotional meanings through the development of metaphors transitional experiences and poetic images Newirth draws on a wealth of clinical material to support his argument that traditional forms of interpretation are considerably less effective in the development of subjectivity than his alternative Neo Kleinian approach He contends that locating subjectivity in the unconscious frees us from the nineteenth century bias which privileged consciousness and rational thought and suggests that the analytic enterprise is not to make the unconscious conscious but rather to make the conscious unconscious Body Talk Janice S. Lieberman, 2000-08 Stressing the important role of vision in the development of identity formation and self esteem she discusses such issues as mirroring the gaze the gleam in the eye feeling invisible or falsely mirrored and the learning early on to attach positive and negative values to one's appearance as they become

manifest in the therapeutic relationship These patients use the therapist as a spectator whose focus on their bodies helps supplement insufficient cathexis and repair feelings of deficit Amply illustrated with clinical vignettes Dr NBS Special Publication ,1975

Lecture Notes In Entrepreneurial Finance For The Digital Economy Peter Joakim Westerholm,2024-06-27 This book is intended to be used as a basis for developing courses in entrepreneurial finance While many universities particularly in the United States have entrepreneurial finance on their curriculum there is often a gap between the large selection of entrepreneurship courses and courses providing applicable hard skills in finance and accounting Early stage ventures cannot succeed without capital and careful management of cash flow for example Entrepreneurs need skills such as how to negotiate with investors so that they don t end up giving up the control of their venture too early This book aims to fill this gap by providing guidelines for how successful courses can be set up to train finance accounting and corporate strategy students for a career in the start up and venture capital industry Monthly Catalog of United States Government Publications ,1993 *Special Publications* ,1940 *Tarascon Pocket Pharmacopoeia 2011 Deluxe Lab Coat Edition* ,2010-12-28 Presents alphabetically arranged entries of drug products providing information on drug dosing trade and generic formulations metabolism pregnancy considerations drug pricing trade names and herbal and alternative therapies
