Taxation, Human Rights, and Sustainable Development Eghosa O. Ekhatior, Newman U. Richards, Chisa Onyejekwe, 2025-06-26. This book investigates the relationship between human rights and taxation, exploring how human rights have been impeded or enhanced through tax laws and policies and what this means for sustainable development in the Global South. Drawing on cases from across the Global South, the book demonstrates the benefits of embedding human rights into tax policies and legislation. The authors not only highlight the role of legislative measures and other human rights regulations in the realisation of international treaty rights but also argue that it creates an environment whereby individuals feel duty-bound to pay taxes when necessary, thereby securing a sustainable revenue source for the state to meet their socio-economic responsibilities. The book investigates key topics such as compliance, redistribution, e-commerce, tax havens and the role of key stakeholders. This book will be useful for researchers from across the fields of law, human rights, taxation and sustainable development.

Mikhail A. Molchanov,2016-03-03 Bridging foreign policy analysis and international political economy this volume offers a new look at the problem of agency in comparative regional integration studies It examines evolving regional integration projects in the Eurasian space defined as the former Soviet Union countries and China and the impact that Russian foreign policy has had on integration in the region Mikhail Molchanov argues that new regionalism in Eurasia should be seen as a reactive response to contemporary challenges that these developing states face in the era of globalization Regional integration in this part of the world treads the unknown waters and may not simply repeat the early steps in the evolution of the European Union The question of a hegemonic leadership in particular as exercised by a country that spearheads regional integration efforts animates much of the discussion offered in the book Moreover Eurasian regionalisms are plural phenomena because of complementary and competing projects that engage the same or partially overlapping groups of countries By combining foreign policy studies with an examination of the international political economy of regionalism in Eurasia the author furthers our understanding of new regionalism both theoretically and empirically
