Tax Management And Tax Evasion New Horizons In Management Sciences:

Justice, Equality and Tax Law Nevla Čičin-Šain, Mario Riedl, 2022-10-05 An in depth analysis of the specific aspects of justice equality and tax law Justice Equality and Tax Law is a topic that is both old and new at the same time Even if the society changes the demands that tax needs to be just and equal seem to be immutable What changes of course is the perception of the content of those demands International taxation post BEPS has been fraught with new challenges that warranted urgent responses These challenges were mainly provoked by the unprecedented rise of the digital economy which truly marked a change in the way business is conducted how value is created and how goods and services are produced and consumed Digitalization in turn had repercussions on all aspects of taxation direct taxation indirect taxation and even tax procedures For instance the quest for more justice and equality in profit taxes was the reason why in October 2021 a historical deal based on a two pillar solution to address the tax challenges arising from the digitalization of the economy was negotiated within the OECD G20 Inclusive Framework on Base Erosion and Profit Shifting and agreed upon by 137 member countries It was also the motive behind the shift from a typical vendor collection model to an intermediary collection model supported by centralized registration points in indirect taxes notably the VAT GST Abundant data from the European Union or the OECD signaled an ever increasing gap between expected VAT revenues and VAT actually collected making it obvious that the classical system of VAT GST collection was unable to respond to challenges posed by the digital economy Therefore new solutions based on the participation of digital platforms as intermediaries had been introduced Finally new technologies such as blockchain paved new avenues in enhancing tax compliance In this context this volume entitled Justice Equality and Tax Law contains not only a selection of the best master s theses of the full time LL M programme in 2021 2022 but also represents an in depth analysis of various aspects of this evergreen topic Tax Management and Tax Evasion Konrad Raczkowski, Lukasz Sulkowski, 2014 The authors of this volume outline the issues of managing taxes and tax evasion mainly with a focus on the European Union in general and Poland in particular Tax management and tax evasion represent an intrinsic element of economic turnover an area of interest both to the institutional and to the real spheres of national economy *The New Horizon of China's Economic Law Theory* Shouwen Zhang, 2020-10-26 This book presents the development and reformation of economic law in China and explores the three relationships between the government and market between reform and rule of law and between the constitution and economic law On this basis it subsequently focuses on development theory distribution theory risk theory and crisis theory Further it addresses effective development fair distribution and prevention and resolution of related risks and crises which are important functions of economic law In order to achieve the above functions and objectives the book argues we must vigorously promote the integration of rule of law in economic law and constantly refine the theory of economic rule of law employed in China The book demonstrates that no matter how the three major relationships are adjusted or the relevant systems are reformed i e regarding the implementation

of the concept of coordinated development or the optimization of economic structures the solution of distribution problems or the improvement of distribution systems the prevention of risks or the response to crises any such changes depend on economic rule of law The above mentioned theoretical discussion presents a new horizon of contemporary Chinese economic law theory which will be of great value to the future development of economic law theory

Malaysia's Taxation System Mohamed Ariff, Yeah Kim Leng, 2023-09-05 Malaysia's Taxation System Contemporary Practices Issues and Future Direction offers a clear and concise analysis of Malaysia's taxation system in terms of its origin and its adaptation to changing economic and social conditions With unique insights from experienced legal accounting and tax practitioners and eminent academics this book highlights the need for a holistic review of the taxation system going forward as the country strives for high income status in the near future

Proceedings of the 2023 3rd International Conference on Financial Management and Economic Transition (FMET 2023) Vilas Gaikar, Min Hou, Yan Li, Yan Ke, 2023-10-13 This is an open access book 2023 3rd International Conference on Financial Management and Economic Transition FMET 2023 will be held on August 18 20 2023 in Changsha China At present the global economic situation is complex the recovery prospects are not clear and the economic growth rate is slowing down which is at the key stage of transforming the economic development mode and industrial transformation and upgrading With the transformation of the mode of economic development various problems and contradictions coexist and the problems of imbalance uncoordinated and unsustainable development are prominent The contradiction between the downward pressure on economic growth and the relative overcapacity has intensified The problems of rising production and operation costs and insufficient innovation capacity coexist The contradiction between the slow growth of fiscal revenue and the increase of government rigid expenditure is prominent The irrational industrial structure the weak agricultural foundation the increasingly acute contradiction between economic development and resources and environment the large gap between urban and rural areas regional development and income distribution of residents and the obvious increase of social contradictions which are related to the vital interests of the public The economy and society are facing a series of opportunities and challenges Therefore it is expected to clarify the obstacles and obstacles to sustainable development and launch measures to deepen reform Macroeconomic growth and its development are highly correlated with the development of enterprises at the microeconomic level Since the outbreak of the international financial crisis the economy especially the real economy has faced the current situation of declining growth rate weak demand rising costs and shrinking profits The essence behind this phenomenon is the difficult problem of structural adjustment and transformation of development mode Now we need to transform to the path of refined and scientific management and achieve higher labor efficiency output with less resource input and lower capital consumption Through numerous micro economies we have achieved a wide ranging transformation of growth thus promoting the transformation of the national economy Among them financial management is of great significance We sincerely invite you to participate in

FMET 2023 to discuss the relationship and development direction between economic transformation and financial upgrading

Modeling and Profiling Taxpayer Behavior and Compliance Alj, Bouchra, Alla, Lhoussaine, Bentalha, Badr, 2025-04-23 In a society where there is mounting pressure on public finances exacerbated by recurring economic crises the issue of tax compliance becomes a significant topic of discussion in the academic political and social spheres It plays a pivotal role in ensuring fiscal stability social justice and economic stability However governments around the world face an increasing prevalence of tax evasion more sophisticated tax optimization practices the complexity of tax regimes and a growing distrust of institutions by citizens These challenges test the capacity of governments to ensure a stable and fair tax base Modeling and Profiling Taxpayer Behavior and Compliance explores the major challenges of tax compliance through the lens of taxpayer behavior shaped by a multitude of economic psychological sociological cultural institutional legal political and technological factors It examines the factors that influence the way individuals and companies comply with their tax obligations Covering topics such as tax morality communication strategies and creative accounting this book is an excellent resource for tax inspectors lawyers and advisors auditors accountants policymakers legislators business leaders entrepreneurs researchers academicians and more

Factors Influencing Individual Taxpayer Compliance Behaviour Ken Devos, 2013-09-30 This volume provides a comprehensive analysis of why taxpayers behave the way they do It reveals the motivations for why some taxpayers comply with the law while others choose not to comply Given the current global financial climate there is a need for governments worldwide to increase their revenue collections via improving taxpayer compliance Research into what shapes and influences taxpayer behavior is critical in that any marginal improvement in understanding and dealing with this behavior can potentially have a dramatic impact upon government revenue Based on Australian data derived from the data bases of the Australian Taxation Office as an example this book presents findings that provide lessons for tax systems around the world Regardless of the type of tax system in place taxpayers of all nationalities are concerned about how their tax authorities deal with non compliance and in particular how the tax authorities go about encouraging compliance and ensuring a fair tax system for all The book presents empirical evidence concerning taxpayer compliance behavior with particular attention being drawn to the moral values of taxpayers the perceived fairness of the tax system and the deterrent measures undertaken by revenue authorities which influence that behavior Other issues examined include the degree to which tax penalties operate as an effective deterrent to curbing behavior and how taxpayers level of general tax knowledge and awareness also impacts upon their actions

Exploring the Roots of Systematic Tax Avoidance in Greece Zoi Pittaki, 2021-07-01 This book explores the interaction between business and the system of taxation in Greece from the mid 1950s up to 2008 the year that marked the eve of the economic crisis the country faced in the aftermath of the international financial crisis of 2007 The evidence presented confirms William Baumol s point about how taxation affects entrepreneurship That is it is shown that Baumol was right when indicating that problematic tax rules can lead to unproductive forms of entrepreneurship such as tax evasion However the focus here is on aspects of the system of taxation that Baumol s model examining solely tax rates and levels of taxation neglected This book shows that as far as Greek entrepreneurship is concerned the adverse effects of the system of taxation came mostly from a series of issues that increased its perceived unfairness and illegitimacy The way that the tax system functioned also increased uncertainty which was anything but beneficial for investing in business This book contributes to the current debates about the Greek economy and the causes of the crisis affecting the country In this respect it also throws light on the big issue of tax evasion burdening the country s fiscal system However the research also belongs to the wider literature examining entrepreneurship from a business history perspective to that focusing on the relation between entrepreneurship and institutions to the debates regarding the ways entrepreneurship is affected by the socio political and economic environment but also to institutional analyses about taxation
