The Politics of Revenue Bargaining in Africa Anne Mette Kjær, Marianne S. Ulriksen, Ane Karoline Bak, 2023-12-21 This book offers in

depth analyses of micro instances of revenue bargaining across five African countries The case studies all draw on a common theoretical framework combining the fiscal contract theory with the political settlement approach which enables a systematic exploration into what triggers revenue bargaining *Ageing and Poverty in Africa* Alun Williams, 2018-10-24 This title was first published in 2003 The rapid demographic aging of populations worldwide and most dramatically in developing countries will result in unprecedented increases in the absolute and relative numbers of the aged in these countries Whilst developed economies already have the basic infrastructure in place through which to support their ageing populations developing nations frequently do not and it should not be assumed that their best course of action is to attempt to duplicate the supportive infrastructures of developed countries In developing nations these may be culturally inappropriate geographically inaccessible economically or politically unsustainable or all of these Effective and sustainable support services must be designed with reference to the circumstances of the client group and it is increasingly evident that knowledge of the lives of the aged in developing countries is currently very limited This book aims to inform the reader on the livelihoods of elders in developing countries and to stimulate a discussion of appropriate methods of supporting them in maintaining their quality of life during and beyond the coming decades of demographic change It does so through reporting the lives and livelihoods of the aged population of Kikole a pseudonym a highly impoverished village in Uganda Individual livelihoods are explored from a lifecourse perspective with present day quality of life being shown often to be the result of earlier enforced changes in circumstances arising in economic social or cultural marginalization political or physical insecurity or macro economic change rather than in the physical or mental changes that may accompany advancing age *Directrices para el control sostenible de las garrapatas y la gestión de la resistencia a los acaricidas en el ganado* Organización de las Naciones Unidas para la Alimentación y la Agricultura , Estas directrices constituyen un recurso completo para gestionar el control de las garrapatas y combatir la resistencia a los acaricidas en el ganado En ellas se hace hincapi en el problema cada vez más grave de la resistencia a los acaricidas que se ha observado en diversas regiones En el documento se proporciona información detallada sobre las características biológicas de las garrapatas los métodos existentes de control con productos químicos sintéticos y los mecanismos subyacentes de la resistencia a los acaricidas Se destaca la importancia de hacer un seguimiento constante de las poblaciones de garrapatas y los niveles de resistencia para fundamentar estrategias de control más eficaces Para hacer frente a esta resistencia en las directrices se recomienda la gestión integrada de las garrapatas un planteamiento holístico que integra tratamientos químicos con métodos no químicos Esta estrategia tiene como objetivo reducir el uso de acaricidas lo que ayuda a retrasar la aparición de la resistencia y minimizar los posibles riesgos para la salud pública y el medio ambiente Además en las directrices se subraya la necesidad de elaborar marcos reglamentarios sólidos que garanticen la calidad la inocuidad y la eficacia de los productos para el control de garrapatas En conclusión en estas directrices se ofrece una visión completa de los desafíos y las estrategias relacionados con el control de garrapatas y la resistencia a los acaricidas

y se aboga por adoptar prácticas sostenibles y realizar estudios de investigación continuos para mejorar la salud y productividad del ganado al tiempo que se reducen los riesgos asociados a las infestaciones de garrapatas y las enfermedades que transmiten

Developments in Animal Health Surveillance, volume II Bernard J. Phiri, Marta Hernandez-Jover, Arata Hidano, Marta Martinez Aviles, 2024-12-13

Animal health surveillance aims to facilitate early detection of outbreaks disease control animal welfare management protection of public health planning and decision making It is a continuous process of collecting key information to produce surveillance insights that are acted upon The ongoing gathering of information is mostly based on the reporting of signs of disease by those close to animals such as animal owners animal carers animal health practitioners and diagnosticians This is often complemented by regular diagnostic testing in one form or another to determine the health status of a particular animal population This surveillance approach faces growing challenges in many countries worldwide The challenges include the emergence of new pathogens budget constraints expansion of disease vector ranges due to climate change the spread of zoonoses as well as changing public and stakeholder expectations To meet these challenges it is important to find new ways of enhancing existing surveillance approaches and develop new ones These include undertaking a One Health approach in which humans animals plants and the environment are part of an integrated ecosystem Within the animal ecosphere surveillance coverage should be adequate for all different animal types i.e livestock companion animals wildlife and feral animals This research topic aims to collate innovative ideas for enhancing all aspects of animal health surveillance Strengthening participation in surveillance by those close to animals is critical Other aspects include but are not limited to sample collection diagnostic processes data and information collection data analysis and information dissemination We also encourage submission of manuscripts with a multidisciplinary scope and those that provide new insights in surveillance implementation or policy
