The Abrsm Song With Cd:

The Song Is Ended and Other Stories Fiona Compton, 2015-04-10 Although this collection of fifteen short stories is fictional it reflects Fiona Compton's wide experience of life. Thus there are stories about singers and accompanists, teachers and pupils, and older people trying to adjust to inevitable changes in their lives. Stories are set in South Africa and Britain and take place on board ship, in schools, homes, studios, or theatres. Several stories are loosely based on particular incidents in her life but are still fiction rather than fact, such as *Dux Scholar*, *Wise Words in the Chippy*, *Michelle By Appointment*, and *The Song is Ended*. Music Education Yearbook, 2003 Navigating Stylistic Boundaries in the Music History Classroom

Esther M. Morgan-Ellis, 2024-04-30 At a time of transformation in the music history classroom and amid increasing calls to teach a global music history, *Navigating Stylistic Boundaries in the Music History Classroom* adds nuance to the teaching of varied musical traditions by examining the places where they intersect and the issues of musical exchange and appropriation that these intersections raise. Troubling traditional boundaries of genre and style, this collection of essays helps instructors to denaturalize the framework of Western art music and invite students to engage with other traditions, vernacular, popular, and non-Western, on their own terms. The book draws together contributions by a wide range of active scholars and educators to investigate the teaching of music history around cases of stylistic borders, exploring the places where different practices of music and values intersect. Each chapter in this collection considers a specific case in which an artist or community engages in what might be termed musical crossover, exchange, or appropriation, and delves deeper into these concepts to explore questions of how musical meaning changes in moving across worlds of practice. Addressing works that are already widely taught but presenting new ways to understand and interpret them, this volume enables instructors to enrich the perspectives on music history that they present and to take on the challenge of teaching a more global music history without flattening the differences between traditions. **The A-Z of Careers and Jobs**

MacGregor, 2024-12-24 Since the early twenty first century music education across the world has been shaped by neoliberal discourse extolling the benefits of music upon academic achievement health and wellbeing and social development However such benefits are far from universal on the contrary music making often reveals our shortcomings and dependencies This highlights an urgent need for music education to be reframed by an understanding of musical vulnerability our inherent and situational openness to being affected by the

semantic and somatic properties of music making Drawing on existing vulnerability studies this book evaluates how musicmaking can foster both positive receptivity and negative susceptibility depending on its delineation of self identity social identity and space and its embodiment through aural receptivity mimetic participation and affective transmission Through phenomenological ethnographic research with teachers and pupils it exposes how values espoused in the music classroom require the personal and interpersonal negotiation of conflicting musical expectations identities and abilities It makes recommendations for music education policymakers teachers and researchers in diverse global contexts suggesting the importance of developing pedagogies of vulnerability in order to foster caring classroom music making praxes that acknowledge music s capacity both to heal and to harm **The British Catalogue of Music** ,2004
