The Ariadne Connection:

Ariadne's Lives Nina daVinci Nichols, 1995 Indeed relatively little work has been done on the Cretan myth cycle as a whole a mixture of heroic Greek legend and savage pre Greek elements generally considered to be antithetical to evolved literary languages As a result although Ariadne has been extremely important in Western art from the time of ancient Greece through the nineteenth century she is rarely included in studies of Greek myth The Epyllion M. Marjorie Crump, 2019-03-07 Published in 1931 *The Epyllion From Theocritus to Ovid* discusses Greek Epics along with extracts of Poems The Connected Past Tom Brughmans, Anna Collar, Fiona Susan Coward, 2016 One of the most exciting recent developments in archaeology and history has been the adoption of new perspectives which see human societies in the past as in the present as made up of networks of interlinked individuals This view of people as always connected through physical and conceptual networks along which resources information and disease flow requires archaeologists and historians to use new methods to understand how these networks form function and change over time *The Connected Past* provides a constructive methodological and theoretical critique of the growth in research applying network perspectives in archaeology and history and considers the unique challenges presented by datasets in these disciplines including the fragmentary and material nature of such data and the functioning and change of social processes over long timespans An international and multidisciplinary range of scholars debate both the rationale and practicalities of applying network methodologies addressing the merits and drawbacks of specific techniques of analysis for a range of datasets and research questions and demonstrating their approaches with concrete case studies and detailed illustrations As well as revealing the valuable contributions archaeologists and historians can make to network science the volume represents a crucial step towards the development of best practice in the field especially in exploring the interactions between social and material elements of networks and long term network evolution **Reports from the Court of Claims Submitted to the House of Representatives** United States. Hillis Miller,1995-02-22 What line should the critic follow in explicating unfolding or unknottting passages How should the critic thread her or his way into the labyrinthine problems of narrative form from chapter I In this brilliant and engaging book one of America s leading literary critics explores the intricacies of narrative theory Using the image of Ariadne s thread which was given to Theseus to carry into the labyrinth so that he could find his way out J Hillis Miller traces out the line so often associated with narrative and writing in general In the process he illuminates the nature of literature as well as the nature of narrative Considering a wide range of texts from Western literature over the last two centuries in particular Meredith s The Egoist Goethe s Elective Affinities and Borges s Death and the Compass Miller explores the way rhetorical devices and figurative language interrupt break into delay and expand storytelling He also illustrates these rhetorical disruptions of narrative logic in his own work In its four chapters about the role of line character interpersonal relationships and figurative language in narrative Miller s study encounters in its own language the problems it discusses as concepts and words are scrutinized for their diverse meanings and resonances Demonstrating that every narrative including this one about the nature of narrative has divergent lines and multiple motives and uses Ariadne s Thread tells its story and enacts its subject at the same time Eros and Economy Barbara Jenkins,2016-07-01 Eros and Economy Jung Deleuze Sexual Difference explores the possibility that social relations between things partially inscribed in their aesthetics offer important insights into collective political economic relations of domination and desire Drawing on the analytical psychology of Carl Jung and the philosophy of Gilles Deleuze this book focuses on the idea that desire or libido overlaid by sexual difference is a driving force behind the material manifestations of cultural production in practices as diverse as art or economy Re reading the history of capitalism and aesthetics with an awareness of the forces of sexual difference reveals not just their integral role in the development of capitalist markets but a new understanding of our political economic relations as humans The appearance of the energies of sexual difference is highlighted in a number of different historical periods and political economies from the Rococo period of pre revolutionary France to the aesthetics and economics of Keynesian Bloomsbury to our contemporary Postmodern sensibility With these examples Jenkins demonstrates that the very constitution of capitalist markets is affected

by the interaction of these forces and she argues that a conscious appreciation and negotiation of them is integral to an immanent democratic understanding of power With its unique application of Jungian theory this book provides important new insights into debates surrounding art aesthetics and identity politics as well as into the quest for autonomous democratic institutions of politics and economics As such this book will appeal to researchers academics and postgraduate students in the fields of Jung psychoanalysis political economy cultural studies and gender studies as well as those interested in the field of cultural economy *Papers on Naval Architecture and Other Subjects Connected with Naval Science* William Morgan
