Powering Our Future Alternative Energy Institute, Kimberly K. Smith, 2005 With nearly all of the world's energy consumption dependent on non-renewable resources, *Powering Our Future* challenges consumers to support changes that will create sustainable energy in the future. The four biggest energy sources, oil, natural gas, coal, and uranium, currently power our earth. What would happen to our society if we experienced severe shortages of one or more of these resources? Such a glimpse into the future may become reality sooner than we think. Oil production is soon expected to begin a rapid descent, with natural gas in close pursuit. *Powering Our Future* is an educational tool that opens the door to a future fueled by sustainable renewable energy. Consumers will learn how our world has become dependent on four nonrenewable resources, how each resource impacts us politically, economically, and environmentally, how renewable resources such as hydrogen fuel cells, wind power, solar energy, hydropower, and more are waiting in the wings, how the transition to renewable resources will take place, offering economically stable and environmentally safe choices. *Powering Our Future* is a solution-oriented guide that will empower you to make more informed choices as a voter, a contributor to a global economy, and a citizen of the earth.

Fossil Fuels and Pollution Julie Kerr Casper, 2010 Provides an introduction to fossil fuels, their impact on the environment worldwide, and why controlling them is crucial to Earth's future climate **Hybrid Vehicles** Allen Fuhs, 2008-09-19 Uncover the Technology behind Hybrids and Make an Intelligent Decision When Purchasing Your Next Vehicle. With one billion cars expected to be on the roads of the world in the near future, the potential for war over oil and the negative environmental effects of emissions will be greater than ever before. Now is the time to seriously consider an alternative. *Big Green Purse* Diane Maceachern, 2008-02-28 Read Diane McEachern's posts on the Penguin Blog. Protecting our environment is one of the biggest issues facing our planet today. But how do we solve a problem that can seem overwhelming, even hopeless? As Diane
