Babies Don't Make Small Talk (So Why Should I?) Julie Vick,2021-08-10 A baby can be a good excuse to skip a party but goodbye alone time hello awkward new social obligations All parents want the same things to balance work and home life to raise happy kids to never attend a baby drumming class and to build a secret room in their home where they can hide preferably not the bathroom Yes an introverted parent would more keenly want to be free of the slew of attention and expectations that accompany both pregnancy and parenthood but even the most outgoing person is sure to reach their limit

eventually Here with laugh out loud humor and well earned experience Julie Vick offers coping mechanisms for everything from sharing the news that you are becoming a parent to the moment the baby is born one way or another it will happen from managing doctor s visits to handling playdates She offers advice on finding childcare and ignoring the nursing versus formula conversation with strangers Witty yet valuable her tips checklists and the occasional chart focus on the time from pregnancy through preschool

Transport, Climate Change and the City Robin Hickman,David Banister,2014-02-05 Sustainable mobility has long been sought after in cities around the world particularly in industrialised countries but also increasingly in the emerging cities in Asia Progress however appears difficult to make as the private car still largely fuelled by petrol or diesel remains the mainstream mode of use Transport is the key sector where carbon dioxide CO2 emissions seem difficult to reduce Transport Climate Change and the City seeks to develop achievable and low transport CO2 emission futures in a range of international case studies including in London Oxfordshire Delhi Jinan and Auckland The aim is that the scenarios as developed and the consideration of implementation and governance issues can help us plan for and achieve attractive future travel behaviours at the city level The alternative is to continue with only incremental progress against CO2 reduction targets to sleepwalk into climate change difficulties oil scarcity a poor quality of life and to continue with the high traffic casualty figures The topic is thus critical with transport viewed as central to the achievement of the sustainable city and reduced CO2 emissions
