National Bureau of Standards,1985 *Photovoltaic and Photoactive Materials* Joseph M. Marshall,Doriana Dimova-Malinovska,2012-12-06 The primary objective of this NATO Advanced Study Institute ASI was to present an up to date overview of various current areas of interest in the field of photovoltaic and related photoactive materials This is a wide ranging subject area of significant commercial and environmental interest and involves major contributions from the disciplines of physics chemistry materials electrical and instrumentation engineering commercial realisation etc Therefore we sought to adopt an inter disciplinary approach bringing together recognised experts in the various fields while retaining a level of treatment accessible to those active in specific individual areas of research and development The lecture programme commenced with overviews of the present relevance and historical development of the subject area plus an introduction to various underlying physical principles of importance to the materials and devices to be addressed in later lectures Building upon this the ASI then progressed to more detailed aspects of the subject area We were also fortunately able to obtain a contribution from Thierry Langlois d Estaintot of the European Commission Directorate describing present and future EC support for activities in this field In addition poster sessions were held throughout the meeting to allow participants to present and discuss their current activities These were supported by what proved to be very effective feedback sessions special thanks to Martin Stutzmann prior to which groups of participants enthusiastically met often in the bar to identify and agree topics of common interest An Introductory Guide to EC Competition Law and Practice Valentine Korah,1994

Handbook of Pulping and Papermaking Christopher J. Biermann, 1996-08-01 In its Second Edition Handbook of Pulping and Papermaking is a comprehensive reference for industry and academia The book offers a concise yet thorough introduction to the process of papermaking from the production of wood chips to the final testing and use of the paper product The author has updated the extensive bibliography providing the reader with easy access to the pulp and paper literature The book emphasizes principles and concepts behind papermaking detailing both the physical and chemical processes A comprehensive introduction to the physical and chemical processes in pulping and papermaking Contains an extensive annotated bibliography Includes 12 pages of color plates **Auger Electron Spectroscopy** Donald T.

Hawkins, 2012-12-06 Auger electron spectroscopy is rapidly developing into the single most powerful analytical technique in basic and applied science for investigating the chemical and structural properties of solids Its explosive growth beginning in 1967 was triggered by the development of Auger analyzers capable of detecting one atom layer of material in a fraction of a second Continued growth was guaranteed firstly by the commercial availability of apparatus which combined the capabilities of scanning electron microscopy and ion mill depth profiling with Auger analysis and secondly by the increasing need to know the atomistics of many processes in fundamental research and engineering applications The expanding use of Auger analysis was accompanied by an increase in the number of publications dealing with it Because of the developing nature of Auger spectroscopy the articles have appeared in many different sources covering diverse disciplines so that it is extremely difficult to discover just what has or has not been subjected to Auger analysis In this situation a comprehensive bibliography is obviously useful to those both inside and outside the field For those in the field this bibliography should be a wonderful time saver for locating certain references in researching a particular topic or when considering various aspects of instrumentation or data analysis This bibliography not only provides the most complete listing of references pertinent to surface Auger analysis available today but it is also a basis for extrapolating from past trends to future expectations
