Knowledge and Skill Chains in Engineering and Manufacturing Eiji Arai, Eindhoven University of Technology, Fumihiko Kimura, Keiichi Shirase, 2008-12-21 Since the first DIISM conference which took place 9 years ago the world has seen drastic changes including the transformation of manufacturing and engineering software and the information and communication technologies deployed The conditions for manufacturing and engineering have changed on a large scale in terms of technology enabled collaboration among the fields of design engineering production usage maintenance and recycling disposal These changes can be observed in rapidly growing fields such as supply chain management As for production technologies at factory floors new visions on human machine co existing systems involve both knowledge management and multi media technologies Therefore because of these changes the importance of information infrastructure for manufacturing has increased stunningly Information infrastructure plays a key role in integrating diverse fields of manufacturing engineering and management This in addition to its basic role as the information and communication platform for the production systems Eventually it should also serve the synthetic function of knowledge management during the life

cycles of both the production systems and their products and for all stakeholders

Foundation ASP for Dreamweaver 8
Rob Turnbull, Omar Elbaga, 2006-12-06 Do you want to learn about Microsoft's ASP and use it via Dreamweaver 8 to add the power of a database to your website Use dynamic web forms to exchange data between you and your users Build complete web applications This book shows you how to do all that and more Dreamweaver 8 takes a lot of the hard work out of performing tasks such as integrating a database into your website but it can't do everything That's why this book not only shows you how to use all of Dreamweaver's functions but also shows you how the underlying code functions so you can then work around Dreamweaver's shortcomings There's no attempt to turn you into a code guru but you'll come away with sufficient knowledge of basic ASP to have the confidence to dive into the Dreamweaver code and tweak it to your own requirements The emphasis is exclusively on ASP so you don't waste any time on information that's not relevant to what you want to do Omar Elbaga and Rob Turnbull first take you through version 8 of Dreamweaver and how ASP fits into it then look in depth at setting up your work environment installing ASP Access and SQL Server and the IIS web server making sure they are all working together and setting up a new web site via Dreamweaver They then get to work using several tutorials and real world examples covering topics such as ASP essentials knowing what ASP code looks like working with forms designing and implementing effective databases using Access and SQL Server debugging and troubleshooting and creating dynamic navigation login and search functionality
