equity or so they claim With 169 recognized genders and sexual orientations a government obsessed with eradicating all traces of its bigoted past and social justice ideology enforced through authoritarian control Captain Pen Lencoln finds himself in an impossible position he s a straight white male commanding the USS DESPAIR on humanity s most equitable mission ever Part One Making Herstory The mission begins with a simple goal track down the ancient Voyager probe and replace its offensive plaque depicting only two human genders with something more inclusive But as DESPAIR ventures deeper into space Lencoln s problems multiply faster than government approved pronouns Between a fanatical Social Justice Officer determined to catch him in thought crimes mysterious Chinese software sabotaging the ship s systems and falling for a woman back on Earth Lencoln must navigate both the cosmos and bureaucratic absurdity When he discovers a digital recreation of his great grandfather hidden in an old laptop he gains a secret advisor from a less enlightened era Part Two Voyager The Last Mission The stakes escalate as Lencoln finally reaches Voyager shadowed by a Chinese vessel with orders to prevent DESPAIR from discovering their secret mining operation Aboard his ship Senior Social Justice Officer Borgmyn works tirelessly to undermine him while the mysterious digital entity Pop offers guidance from beyond As Lencoln faces the moment of truth at Voyager he must choose follow orders and erase the last remnant of Old America or take a stand that could cost him everything Part Three Saving History When Lencoln chooses to bring Voyager aboard instead of destroying it he becomes an enemy of the state The old records on Voyager reveal the truth about an American history that has been systematically erased a history of creativity innovation and freedom As forces from both New America and China conspire to silence him Lencoln finds unlikely allies in the Republic of Texas and discovers an extraordinary defense system created by his digital ancestor His fight for survival becomes a battle to reclaim the forgotten spirit of a once great nation This provocative military science fiction trilogy dares to challenge contemporary political trends through the lens of a future gone wrong crafting a world that s simultaneously thrilling and unsettling Perfect for readers seeking stories that celebrate traditional values question authority and explore the enduring power of truth in the face of ideological conformity If you enjoyed 1984 by George Orwell Starship Troopers by Robert A Heinlein and Fahrenheit 451 by Ray Bradbury you ll love Apollo Wept

Intelligent Autonomous Systems 9 Tamio Arai, 2006 Autonomy and adaptivity are key aspects of truly intelligent artificial systems dating from the first IAS conference in 1989 The goal of IAS 9 is to lay out scientific ideas and design principles for artificial systems This work contains papers that cover both the applied and the theoretical aspects of intelligent autonomous systems

Microcomputers in the Neurosciences G. A. Kerkut, 1985 This book shows how electrophysiologists neuroanatomists and neurochemists can use personal computers to solve their laboratory problems Expensive minicomputers are already being used for these tasks but most researchers are unaware of the capabilities of these simpler machines The editor has brought together a team of nine experts to describe their experiences with computers and microprocessors in their work Different micros are discussed and their relative advantages evaluated details are given of

the applications of systems based on the 6502 and Z80 chips of electrophysiology In a separate chapter a package for the Apple II is described which provides quantitative analysis of light microscopic and EM sections for neuroanatomists Finally there are chapters on simple molecular modelling and the construction of hardware for a Z80 interface A glossary of all technical terms used in the book is provided

The Informatics Handbook S.A. Fist,2012-12-06 This is not a dictionary and nor is it an encyclopedia It is a reference and compendium of useful information about the converging worlds of computers communications telecommunications and broadcasting You could refer to it as a guide for the Information Super Highway but this would be pretentious It aims to cover most of the more important terms and concepts in the developing discipline of Informatics which in my definition includes the major converging technologies and the associated social and cultural issues Unlike a dictionary this handbook makes no attempt to be prescriptive in its definitions Many of the words we use today in computing and communications only vaguely reflect their originations And with such rapid change older terms are often taken twisted inverted and mangled to the point where any attempt by me to lay down laws of meaning would be meaningless The information here is descriptive I am concerned with usage only This book therefore contains keywords and explanations which have been culled from the current literature from technical magazines newspapers the Internet forums etc This is the living language as it is being used today not a historical artifact of 1950s computer science
