History of Electric Cars Nigel Burton, 2013-06-30 One hundred years ago electric cars were the most popular automobiles in the world In the late nineteenth century and at the start of the twentieth century they outsold every other type of car And yet within a couple of decades of the start of the twentieth century the electric car had vanished Thousands of battery powered cars disappeared from the streets replaced by the internal combustion engine and their place in the history of the automobile was quietly erased A century later electric cars are making a comeback Fears over pollution and global warming have forced manufacturers to reconsider the electric concept A History of Electric Cars presents for the first time the full story of electric cars and their hybrid cousins It examines how and why electric cars failed the first time and why today's car manufacturers must learn the lessons of the past if they are to avoid repeating previous mistakes all over again The book examines in detail Early vehicles such as the Lohner Porsche petrol electric hybrid of 1901 Key figures in the history of the electric car development such as Henry Ford Sir Clive Sinclair's plans to build a number of electric vehicles designed to sit alongside the Sinclair C5 The return of the electric technology to vehicles as diverse as the NASA Lunar Rover commuting vehicles and supercars Future developments in electric cars For the first time the full story of electric cars and their hybrids are examined The hidden past of the electric automobile is uncovered and its future developments are discussed Superbly illustrated with 300 colour photographs many of which are rare and original sketch designs Nigel Burton has written and lectured on cars and automotive history for more than twenty years

The Life of the Automobile Steven Parissien, 2014-05-13 The Life of the Automobile is the first comprehensive world history of the car The automobile has arguably shaped the modern era more profoundly than any other human invention and author Steven Parissien examines the impact development and significance of the automobile over its turbulent and colorful 130 year history Readers learn the grand and turbulent history of the motor car from its earliest appearance in the 1880s as

little more than a powered quadricycle and the innovations of the early pioneer carmakers The author examines the advances of the interwar era the Golden Age of the 1950s and the iconic years of the 1960s to the decades of doubt and uncertainty following the oil crisis of 1973 the global mergers of the 1990s the bailouts of the early twenty first century and the emergence of the electric car This is not just a story of horsepower and performance but a tale of extraordinary people of intuitive carmakers such as Karl Benz Sir Henry Royce Giovanni Agnelli Fiat Andr Citro n and Louis Renault of exceptionally gifted designers such as the eccentric Ohio born Chris Bangle BMW and of visionary industrialists such as Henry Ford Ferdinand Porsche the Volkswagen Beetle and Gene Bordinat the Ford Mustang among numerous other game changers Above all this comprehensive history demonstrates how the epic story of the car mirrors the history of the modern era from the brave hopes and soaring ambitions of the early twentieth century to the cynicism and ecological concerns of a century later Bringing to life the flamboyant entrepreneurs shrewd businessmen and gifted engineers that worked behind the scenes to bring us horsepower and performance The Life of the Automobile is a globe spanning account of the auto industry that is sure to rev the engines of entrepreneurs and gearheads alike Energy, Transport, & the Environment Oliver

Developing Countries Harald Winkler, 2017-10-02 Five case studies on mitigation actions MAs in developing countries illustrate the rich diversity of climate action Researchers from Brazil Chile Colombia Peru and South Africa reflect on what is possible in their countries Case studies reflect the sheer diversity of NAMAs from a Pronami on efficient lighting in Peru to longer term challenges of rising energy emissions in Brazil and much else The book compares the similarities and differences

across eight elements that could assist in developing and implementing mitigation. The comparative analysis highlights both how challenging implementation can be in the context of development but also points to factors that might enable ambitious mitigation. The comparison suggests that choice of Mas may be linked to institutional capacity, the resources a country is endowed with and hence its emissions profile. International support can be an important global enabler. The authors find that addressing both development and climate objectives is key. This book fills an important gap in the literature from developing country authors about mitigation actions in their own countries. This book was published as a special issue of *Climate and Development*. Case Studies in Social Entrepreneurship Michael Pirson, 2017-09-08. This book is an essential resource for

the increasing number of facilitators who wish to help students learn about the promise and pitfalls of social enterprise. The oikos Ashoka case competition for social entrepreneurship was conceived in 2007 as a way to help find great material and case studies in this emerging field. This fourth collection of oikos case studies is based on the winning cases from the 2010 to 2014 annual case competitions. These cases have been highly praised because they provide excellent learning opportunities, tell engaging stories, deal with recent situations, include quotations from key actors, are thought provoking and controversial, require decision making and provide clear take aways. This new volume of social entrepreneurship case studies highlights cases from around the globe authored by teachers from around the globe. The selected cases span many industries and geographic contexts; nevertheless, they are connected by a shared ambition to highlight the power of entrepreneurship to solve social problems. The cases are clustered in three different sections: Socially oriented Enterprise Cases, Health and Fair trade, Ecologically oriented social enterprises, and Corporate Social Entrepreneurship. Case Studies in Social Entrepreneurship will be an essential purchase for educators and is likely to be widely used as a course textbook at all levels of management education. Online Teaching Notes to accompany each chapter are available on request with the purchase of the book. Uberpreneurs Peter Andrews, Fiona Wood, 2013-12-08. Exploring the lives and achievements of 36 extraordinary individuals from across 18 nations and every continent, this book's champions innovators, the disruptive individuals whose heroic visions and indomitable spirits are redefining the economic and social structure of our world.

Situated Design Methods Jesper Simonsen, Connie Svabo, Sara Malou Strandvad, Kristine Samson, Morten Hertzum, 2021-12-14. A handbook of situated design methods with analyses and cases that range from designing study processes to understanding customer experiences to developing interactive installations. All design is situated, carried out from an embedded position. Design involves many participants and encompasses a range of interactions and interdependencies among designers, designs, design methods, and users. Design is also multidisciplinary, extending beyond the traditional design professions into such domains as health, culture, education, and transportation. This book presents eighteen situated design methods, offering cases and analyses of projects that range from designing interactive installations, urban spaces, and environmental systems to understanding customer experiences. Each chapter presents a different method.

combining theoretical methodological and empirical discussions with accounts of actual experiences The book describes methods for defining and organizing a design project organizing collaborative processes creating aesthetic experiences and incorporating sustainability into processes and projects The diverse and multidisciplinary methods presented include a problem and project based approach to design studies a Wheel of Rituals intended to promote creativity a pragmatist method for situated experience design that derives from empirical studies of film production and performance design and ways to transfer design methods in a situated manner The book will be an important resource for researchers students and practitioners of interdisciplinary design

Recycling Strategy and Challenges Associated with Waste Management Towards Sustaining the World Hosam M. Saleh,Amal I. Hassan,2023-02-22 Recycling is an act of collecting and processing items that would otherwise be discarded as waste in order to create a new product Recycled material is being

used in an increasing number of today's products. Waste management is primarily concerned with a wide range of wastes including industrial, biological, household, municipal, organic, biomedical, and radioactive wastes. Human activity such as the mining and processing of basic resources generates waste and poses health problems that can emerge both indirectly and directly. Waste mismanagement is a serious problem on an individual and a governmental level. Nowadays the waste disposal business is struggling to adapt to globalized consumerism, a system in which things are manufactured on one continent, purchased and used on another, and disposed of on yet another. Therefore, remediation is often subject to a variety of legal criteria, but it can also be based on evaluations of human health and environmental concerns in cases where no statutory standards exist or when standards are advisory. This book discusses recycling strategies and technologies to find solutions to waste management. Chapters address such topics as biodegradable waste, the circular economy, managing industrial and nuclear waste, and much more.

IBP, Inc., *The Global Automotive Industry* Paul Nieuwenhuis, Peter Wells, 2015-08-06

The automotive industry is still one of the world's largest manufacturing sectors, but it suffers from being very technology-focused as well as being relatively short-term focused. There is little emphasis within the industry and its consultancy and analyst supply network on the broader social and economic impacts of automobility and of the sector that provides it. The Global Automotive Industry addresses this need and is a first port of call for any academic, official, or consultant wanting an overview of the state of the industry. An international team of specialist researchers, both from academia and business, review and analyse the key issues that make vehicle manufacturing still the world's premier manufacturing sector, closely tied in with the fortunes of both established and newly emerging economies. In doing so, it covers issues related to manufacturing, both established practices as well as new developments; issues relating to distribution, marketing, and retail; vehicle technologies and regulatory trends; and crucially, labour practices and the people who build cars. In all this, it explains both how the current situation arose and also likely future trajectories, both in terms of social and regulatory trends, as the technological, marketing, and labour practice responses to those leading in many cases to the development of new business models.

Key features: Provides a global overview of the automotive industry, covering its current state and considering future challenges. Contains contributions from international specialists in the automotive sector. Presents current research and sets this in an historical and broader industry context. Covers threats to the industry, including globalization, economic, and environmental sustainability. The Global Automotive Industry is a must-have reference for researchers and practitioners in the automotive industry and is an excellent source of information for business schools, governments, and graduate and undergraduate students in automotive engineering.
