

Audi A3 Audi A3 Sportback Quick reference guide

Dear Audi Driver,

This quick reference guide gives you a brief introduction to the main features and controls of your vehicle.

However, it cannot replace the Owner's Manual and the other manuals supplied with the vehicle; these contain important information and safety warnings.

We wish you safe and enjoyable motoring with your Audi.

Audi AG

Locking and unlocking the vehicle

The central locking system locks and unlocks all the doors, the tailgate and the tank flap. It can be operated with the remote control or by turning the key in the lock.

Remote control keys

Press the appropriate button for about 1 second.

- ➊ **Unlocking button:** Open one of the doors within about 60 seconds, otherwise the vehicle will lock itself again automatically.
- ➋ **Unlocking button for tailgate:**
- ➌ **Locking button:** The turn signals flash once to confirm that the doors and tailgate are properly closed and locked.
- ➍ **Folding out the master key:** Press the release button.

Folding away the master key: Press the button and hold the key until.

Alarm: Press and hold the unlocking button on the remote control to open all the windows automatically. Press and hold the locking button to close all the windows and the sun roof.

⚠ WARNING!

The doors and windows cannot be opened from inside the vehicle if it has been locked from the outside.

Anti-theft alarm

The alarm system is automatically set when you lock the car and switched off when you unlock the car with the remote control. If you unlock the vehicle by inserting the key in the driver's door, the ignition must be switched on within 10 seconds, otherwise the alarm will be triggered.

Sun roof

The ignition must be switched on to open and close the sun roof.

To tilt open: Briefly press pull the control while it is in position ➊ in order to tilt the roof open/closed. Press or pull the control and hold it to make the roof tilt up or down to the desired position.

Comfort setting for last wind colour: Turn the control until it engages at position ➋.

To open: Turn the control to position ➌ and hold it there.

To close: Turn the control until it engages at position ➍.

open sky sun roof

The ignition must be switched on to open and close the sun roof.

To tilt open: Briefly press rear end of switch marked ➊.

Comfort setting for last wind colour: Briefly press rear end of switch marked ➋ TWICE.

To open/close the sun roof: Press rear end of switch ➌ (open) or front end of switch ➍ (close) until the open sky sun roof is fully open/closed or has reached the desired position.

Urban Transport Systems G. Passerini,C. Borrego,2020-04-02 Better urban transport systems are needed to achieve a healthier environment and as a result a wide range of research has originated from many different countries These studies highlight the importance of innovative systems new approaches and original ideas which need to be thoroughly tested and critically evaluated before they can be implemented in practice To address the need to solve important pollution problems the papers included in this book focus on the relationship with urban transport There is also a growing need for integration with telecommunications systems and IT applications in order to improve safety security and efficiency The variety of topics

covered in this volume reflects the complex interaction of the urban transport systems with their environment and the need to establish integrated strategies The aim is to arrive at optimal socio economic solutions while reducing the negative environmental impacts of current transportation systems

Finance Week ,2005-07 **Vehicle Technology** Dieter Schramm,Benjamin Hesse,Niko Maas,Michael Unterreiner,2020-06-08 The motor vehicle technology covered in this book has become in the more than 125 years of its history in many aspects an extremely complex and in many areas of engineering science Motor vehicles must remain functional under harsh environmental conditions and extreme continuous loads and must also be reliably brought into a safe state even in the event of a failure by a few trained operators The automobile is at the same time a mass product which must be produced in millions of pieces and at extremely low cost In addition to the fundamentals of current vehicle systems the book also provides an overview of future developments such as for example in the areas of electromobility alternative drives and driver assistance systems The basis for the book is a series of lectures on automotive engineering which has been offered by the first named author at the University of Duisburg Essen for many years Starting from classical systems in the automobile the reader is given a systemic view of modern motor vehicles In addition to the pure basic function the modeling of individual sub systems is also discussed This gives the reader a deep understanding of the underlying principles In addition the book with the given models provides a basis for the practical application in the area of simulation technology and thus achieves a clear added value against books which merely explain the function of a system without entering into the modeling On the basis of today s vehicle systems we will continue to look at current and future systems In addition to the state of the art the reader is thus taught which topics are currently dominant in research and which developments can be expected for the future In particular a large number of practical examples are provided directly from the vehicle industry Especially for students of vehicle oriented study courses and lectures the book thus enables an optimal preparation for possible future fields of activity
