Answer: Learning objectives at present appear to stress knowledge at concepts rather than understanding and the ability to transfer knowledge to new situations. The focus is on the student's ability to recall and reproduce knowledge rather than on the student's ability to apply knowledge to new situations.	1. Develop concepts and skills at the abstract level in the classroom. 2. Before leaving the classroom, the student should be able to apply the concepts to a specific situation. 3. After leaving the classroom, the student should be able to apply the concepts to a specific situation.

Interpretation: Psychological
The concept of "psychological" is often used to describe the mind, emotions, and behavior. It is a broad term that encompasses a wide range of phenomena, from the most basic of instincts to the most complex of thought processes. The word "psychological" is derived from the Greek word "psyche," which means "mind" or "soul." The suffix "-ology" means "the study of," so "psychology" is the study of the mind and behavior. The term "psychological" is used to describe anything that is related to the mind or behavior, such as "psychological health," "psychological development," or "psychological research." The concept of "psychological" is often used in a variety of contexts, including in the fields of psychology, medicine, education, and law. It is a term that is used to describe a wide range of phenomena, from the most basic of instincts to the most complex of thought processes.

– **Removing the joints from the surface and replacing all existing material from 1 inch down:** the existing material is removed in order the foundation remains as well as the waterproofing. The existing material is then poured with a new concrete surface and waterproofing material is then applied to the exterior surface of the foundation.
