Singing by Herself Amelia Worsley, 2024-08-15 Singing by Herself reinterprets the rise of literary loneliness by foregrounding the female and feminized figures who have been overlooked in previous histories of solitude Many of the earliest records of the terms lonely and loneliness in British literature describe solitaries whose songs positioned them within the tradition of female complaint Amelia Worsley shows how these feminized solitaries for whom loneliness was both a space of danger and a space of productive retreat helped to make loneliness attractive to future lonely poets despite the sense of suspicion it evoked Although loneliness today is often associated with states of atomized interiority soliloquy and self enclosure this study of eighteenth century poetry disrupts the presumed association between isolation singular speech and bounded models of poetic subjectivity In five chapters focused on lonely poet figures in the works of John Milton Anne Finch Alexander Pope Thomas Gray and Charlotte Smith which also take account of the wider eighteenth century fascination with literary loneliness Singing by Herself shows how poets increasingly associated the new literary mode of being alone with states of disembodiment dispersal and echoic self doubling Seemingly solitary lonely voices often dissolve into polyvocal allusive community Worsley argues when in dialogue with each other and also with classical figures of

feminized lament such as Sappho Echo and Philomela The book's provocative reflections on lyric mean that it will have a broad appeal to scholars interested in the history of poetry and poetics as well as to those who study the literary history of gender affect and emotion
