J. Prince,1996 *UnRoman Britain* Dr Miles Russell,Stuart Laycock,2011-09-30 Roman Britain is usually thought of as a land full of togas towns and baths with Britons happily going about their Roman lives under the benign gaze of Rome This is to a great extent a myth that developed after Roman control of Britain came to an end in particular when the British Empire was at its height in the late nineteenth and early twentieth centuries In fact Britain was one of the least enthusiastic elements of the Roman Empire The northern part of Britain was never conquered at all despite repeated attempts Some Britons adopted Roman ways in order to advance themselves and become part of the new order or just because they liked the new range of products available However many failed to acknowledge the Roman lifestyle at all while many others were only outwardly Romanised clinging to their own identities under the occupation Britain never fully embraced the Empire and was itself never fully accepted by the rest of the Roman world Even the Roman army in Britain became chronically rebellious and a source of instability that ultimately affected the whole Empire As Roman power weakened the Britons abandoned both Rome and almost all Roman culture and the island became a land of warring kingdoms as it had been before **Discovering British Literature in Bits and Bytes** Carolyn M. using the first hand accounts of the soldiers shows how their perception of battle changed Innovations like the percussion and breech loading rifle influenced the fighting in the Crimean War of the 1850s and the colonial campaigns of the 1870s and 1880s in particular in the Anglo Zulu War and the wars in Egypt and Sudan The machine gun was used to deadly effect at the Battle of Omdurman in 1898 and equally dramatic advances in artillery took warfare into a new era of tactics and organization Stephen Manning s work provides the reader with an accurate and fascinating insight into a key aspect of nineteenth century military history
