Human Rights in Nigeria's External Relations Philip Aka, 2016-12-20 This book is a broad ranging argument for thorough reforms at home and abroad in Nigeria as the only antidote to the nation building dilemmas Nigeria confronts in the first quarter of the twenty first century Because of its enormous material and human endowments Nigeria is dubbed the Giant of Africa It is a moniker many of its leaders take seriously Yet Nigeria is a state rife with instability some of it periodically erupting into

violence Given still ongoing national security challenges in the land that notoriously includes a bloody religion oriented terrorism the Fourth Republic since 1999 the longest period of continuous democratic rule since independence key to the timeline of this book has not been insulated from the spell of instability The main argument of this work is that internationally agreed upon ethical standards embedded in human rights can save Nigeria This book is a methodologically and theoretically grounded seminal discourse on Nigerian foreign relations that spells out the human rights or lack thereof in those relations including underlying and impinging domestic forces This work is set around six issues of application embedded in a temple of Nigeria s human rights foreign policy comprising two steps and four pillars reconstructed national interest increased human rights at home redesigned peacekeeping reshaped foreign policy machinery increased bilateralism in foreign relations and the use of ECOWAS as human rights tool Although focused on the period since independence for proper understanding of events from the past that shape the current patterns of politics in the land this book also embodies a historical background chapter that overviews the pre colonial and colonial eras

The New Era Of Exponential Encryption Mele Gasakis,Max Schmidt,2019-01-08 In their book Era of Exponential Encryption Beyond Cryptographic Routing the authors provide a vision that can demonstrate an increasing multiplication of options for encryption and decryption processes Similar to a grain of rice that doubles exponentially in every field of a chessboard more and more newer concepts and programming in the area of cryptography increase these manifolds both encryption and decryption require more session related and multiple keys so that numerous options even exist for configuring hybrid encryption with different keys and algorithms symmetric and asymmetrical methods or even modern multiple encryption with that ciphertext is converted again and again to ciphertext It will be analyzed how a handful of newer applications like e g Spot On and GoldBug E Mail Client Crypto Chat Messenger and other open source software programming implement these encryption mechanisms Renewing a key several times within the dedicated session with cryptographic calling has forwarded the term of perfect forward secrecy to instant perfect forward secrecy IPFS But even more if in advance a bunch of keys is sent a decoding of a message has to consider not only one present session key but over dozens of keys are sent prior before the message arrives The new paradigm of IPFS has already turned into the newer concept of these Fiasco Keys Fiasco Keys are keys which provide over a dozen possible ephemeral keys within one session and define Fiasco Forwarding the approach which complements and follows IPFS And further by adding routing and graph theory to the encryption process which is a constant part of the so called Echo Protocol an encrypted packet might take different graphs and routes within the network This shifts the current status to a new age The Era of Exponential Encryption so the vision and description of the authors If routing does not require destination information but is replaced by cryptographic insights then it is beyond cryptographic routing Cryptographic Discovery means If the cryptographic token is matching the message belongs to me The Echo Protocol is in this regard an initial welcome within the Era of Exponential Encryption The authors identify also four arms within the Era of Exponential Encryption and derive from

Relations in the Age of General Muhammadu Buhari and His Successors Philip C. Aka, 2024-07-17 Under the Fourth Republic since 1999 the challenge Nigerian leaders face like never before is how to create a state that matches the expectations of their diverse peoples at home and abroad Taking this proposition as starting point this book advances proposals for a human right policy referred to alternately in the work as principled foreign policy for Nigeria under the Fourth Republic taking advantage of the inestimable opportunity afforded by General Muhammadu Buhari's departure from the political scene on May 29 2023 after the famine domestically and externally wrought by his two terms of office as President It is a broad ranging argument draped in the less arcane constitutional vocabulary and material of human rights for thoroughgoing reforms at home and abroad as the only antidote to the nation building dilemmas Nigeria confronts in the first quarter of the twenty first century Buhari's departure marks the end of military teleguidance of Nigerian politics under the Fourth Republic in the camouflage of democratic rule a birthmark of remote control dating back to the first military intervention in the country in January 1966 These momentous events within Nigeria coincide with equally epoch making developments in the UK Nigeria's former colonial overlord with ripple effects in Nigeria signified by the death of Queen Elizabeth II after seven decades on the throne and the emergence of Prince Charles as King of England A new monarch in Britain adds to the opportunity that falls open for the reconfiguration of Nigeria's external relations with ramifications for the application of human rights in those relations Despite its known disabilities Nigeria has the potential infrastructure including its sizable population to conduct a human right policy if its leaders rationalize the country's resources more wisely

Globalization of the Free Economy Nawar Al-Saadi, 2020-10-17 There are deep flaws in this view of globalization The chief one is that established fact and known economic patterns don't support skepticism about the benefits of trade and cross border investment While open economies always are subject to new competition and structural changes that affect firms and jobs the flip side of the coin is that the same economic processes create a lot of new jobs and business opportunities and ultimately improve the living standards Moreover the new jobs that are created tend to be better rewarded and come with better working conditions New output is often greener and thrives on new technology leading to positive change also outside
