User Initiated Transformations Of Public Housing:

Extending Themselves A. Graham Tipple, 2014-05-14 Many countries have large stocks of government built housing which for various reasons are in poor physical conditions and or do not conform to the expectations of occupants The occupants of such housing frequently make unauthorised but quite considerable changes and extensions transformations to their dwellings This book examines user initiated transformations to government built housing in Bangladesh Egypt Ghana and Zimbabwe surveyed in a research programme sponsored by the UK Department for International Development The 1600 dwellings surveyed show how relatively low income households are capable of supplying new rooms and services both to improve their own housing conditions and to supply rental rooms or accommodation for family members living rent free The new construction is often of at least as good quality as the original structures and sometime envelopes the original in a new skin It is clear that transformation adds accommodation and services to existing housing upgrades the housing stock and creates variety out of uniformity The study leads to policy suggestions to encourage transformations for the renewal of government housing These include the provision of loan finance the encouragement of co operation between neighbours especially in multi storey housing and the planned colonisation of open space next to the dwellings where plots are not provided For new housing it is clear that designs for new areas are only the beginning of an on going development process rather than a blueprint for once for all development

The Transformation of America's Public Housing Henry Cisneros, 1996 *Self Help Transformations of Low Cost Housing* A. Graham Tipple, 1991 **New Deal Ruins** Edward G. Goetz, 2013-03-15 Public housing was an integral part of the New Deal as the federal government funded public works to generate economic activity and offer material support to families made destitute by the Great Depression and it remained a major element of urban policy in subsequent decades As chronicled in *New Deal Ruins* however housing policy since the 1990s has turned to the demolition of public housing in favor of subsidized units in mixed income communities and the use of tenant based vouchers rather than direct housing subsidies While these policies articulated in the HOPE VI program begun in 1992 aimed to improve the social and economic conditions of urban residents the results have been quite different As Edward G Goetz shows hundreds of thousands of people have been displaced and there has been a loss of more than 250 000 permanently affordable residential units Goetz offers a critical analysis of the nationwide effort to dismantle public housing by focusing on the impact of policy changes in three cities Atlanta Chicago and New Orleans Goetz shows how this transformation is related to pressures of gentrification and the enduring influence of race in American cities African Americans have been disproportionately affected by this policy shift it is the cities in which public housing is most closely identified with minorities that have been the most aggressive in removing units Goetz convincingly refutes myths about the supposed failure of public housing He offers an evidence based argument for renewed investment in public housing to accompany housing choice initiatives as a model for innovative and equitable housing policy

Where are Poor People to Live?: Transforming Public Housing Communities Larry Bennett,Janet L. Smith,Patricia A Wright,2015-03-26 This groundbreaking book shows how major shifts in federal policy are spurring local public housing authorities to demolish their high rise low income developments and replace them with affordable low rise mixed income communities It focuses on Chicago and that city s affordable housing crisis but it provides analytical frameworks that can be applied to developments in every American city Where Are Poor People to Live provides valuable new empirical information on public housing framed by a critical perspective that shows how shifts in national policy have devolved the U S welfare state to local government while promoting market based action as the preferred mode of public policy execution The editors and chapter authors share a concern that proponents of public housing restructuring give little attention to the social political and economic risks involved in the current campaign to remake public housing At the same time the book examines the public housing redevelopment process in Chicago with an eye to identifying opportunities for redeveloping projects and building new communities across America that will be truly hospitable to those most in need of
