Medium-Sized Cycloalkenes via Fused-Cyclobutenes Tomohiro Ito,2024-04-05 This book explains the existence of the

intermediate using two approaches computational chemistry and coordination chemistry In this book the author has developed new methods for synthesizing medium sized cycloalkenes by utilizing the 4 electrocyclic reaction of fused cyclobutenes The fundamental and most important strategy and feature of the work are as follows first cyclobutene is used as a readily available raw material with high strain energy to generate more strained medium sized cis trans cycloalkadiene molecules Second by judiciously selecting the reaction conditions the short lived intermediate medium sized cis trans cycloalkadiene can be converted to medium sized cis or trans cycloalkenes For the former the generation of the medium sized cis trans cycloalkadiene intermediate is greatly affected by the substituent on the cyclobutene and there are few examples of its generation confirmed at room temperature Regarding the latter the synthesis of trans cycloalkenes is noteworthy in terms of establishing a new synthetic methodology and providing one of the few asymmetric synthesis methods which has not been achieved before Readers of this book can gain novel insights into strained molecules involved not only in small sized cycloalkenes but also in medium sized ones
