Next-Generation Big Data Butch Quinto, 2018-06-12 Utilize this practical and easy to follow guide to modernize traditional enterprise data warehouse and business intelligence environments with next generation big data technologies. Next Generation Big Data takes a holistic approach covering the most important aspects of modern enterprise big data. The book covers not only the main technology stack but also the next generation tools and applications used for big data warehousing, data warehouse optimization, real time and batch data ingestion and processing, real time data visualization, big data governance, data wrangling, big data cloud deployments and distributed in memory big data computing. Finally, the book has an extensive and detailed coverage of big data case studies from Navistar, Cerner, British Telecom, Shopzilla, Thomson Reuters, and Mastercard. What You'll Learn: Install Apache Kudu, Impala, and Spark to modernize enterprise data warehouse and business intelligence environments; complete with real world, easy to follow examples and practical advice; Integrate HBase, Solr, Oracle SQL Server, MySQL, Flume, Kafka, HDFS, and Amazon S3 with Apache Kudu, Impala, and Spark; Use StreamSets, Talend, Pentaho, and CDAP for real time and batch data ingestion and processing; Utilize Trifacta, Alteryx, and Datameer for data wrangling and interactive data processing; Turbocharge Spark with Alluxio, a distributed in memory storage platform; Deploy big data in the cloud using Cloudera Director; Perform real time data visualization and time series analysis using Zoomdata; Apache Kudu, Impala, and Spark; Understand enterprise big data topics such as big data governance, metadata management, data lineage, impact analysis, and policy enforcement, and how to use Cloudera Navigator to perform common data governance tasks; Implement big data use cases such as big data warehousing, data warehouse optimization, Internet of Things, real time data ingestion and analytics, complex event processing, and scalable predictive modeling; Study real world big data case studies from innovative companies including Navistar, Cerner, British Telecom, Shopzilla, Thomson Reuters, and Mastercard. Who This Book Is For: BI and big data warehouse professionals interested in gaining practical and real world insight into next generation big data processing and analytics using Apache Kudu, Impala, and Spark, and those who want to learn more about other advanced enterprise topics. [Humanism and Resilience in Residency Training](#) Ana Hategan, Karen Saperson, Sheila Harms, Heather Waters, 2020-06-24 This book aims to help identify pre-existing adaptive traits and positive perspectives in resident trainees while challenging those that are less adaptive by building a formal curriculum for medical education that focuses on the humanistic aspects of medicine. Humanism in medicine is threatened by the false narrative that good physicians are superhumans who do not have their own needs. Written by experts in the field, this book is designed to be a concise integrated guide to resilience during residency training. Through this guide, trainees learn i) the usefulness of psychotherapeutic strategies for their own stress management and well-being; ii) techniques and strategies that are useful in the practice of medicine; and iii) to consider lifestyle modifications to improve physical and psychological health and well-being through identification of positive and negative lifestyle factors influencing physicians.

response to stress Since it is designed for busy trainees and physicians this volume meticulously provides easy to use evidence based learning tools and therapeutic techniques including case studies skill building exercises self test questionnaires illustrations useful practice reminder tips and other features Humanism and Resilience in Residency Training is an excellent resource for all medical trainees and professionals who need to incorporate humanism and resilience in their practice both for accreditation requirements and for personal well being This includes medical students and residents psychiatrists addiction medicine specialists family physicians medical education professionals hospitalists nurses and all healthcare providers

Next Generation Information Technologies and Systems Yishai Feldman,Donald Kraft,Tsvi Kuflik,2009-09-30 Information

technology is a rapidly changing field in which researchers and developers must continuously set their vision on the next generation of technologies and the systems that they enable. The Next Generation Information Technologies and Systems (NGITS) series of conferences provides a forum for presenting and discussing the latest advances in information technology. NGITS conferences are international events held in Israel; previous conferences have taken place in 1993, 1995, 1997, 1999, 2002, and 2006. In addition to 14 reviewed papers, the conference featured two keynote lectures and an invited talk by notable experts. The selected papers may be classified roughly in five broad areas: Middleware and Integration, Modeling Healthcare Biomedical Service and Information Management Applications. NGITS 2009 also included a demonstration session and an industrial track focusing on how to make software development more efficient by cutting expenses with technology and infrastructures. This event is the culmination of efforts by many talented and dedicated individuals. Driving Quality in Informatics: Fulfilling the Promise Alex Mu-Hsing Kuo, Omid Shabestari, 2015-02-15. Although the data in healthcare comes from and relates to patients, it has generally been the clinician and not the patient who has been seen as the end user of health information or health information technology. This seems set to change though, as the evolution of new online tools and mobile applications has led to the growth of a grass roots effort from patients to change their role and involvement in their own health management. This book presents papers from the Information Technology and Communications in Health conference (ITCH) 2015 held in Victoria, Canada, in February 2015. The theme of this conference is patient centered care, and not only were contributors asked to consider the role and voice of the patient, but patients themselves were invited to contribute papers describing their experiences in healthcare and their use of their own data. The papers included here reflect not only informatics innovations in the field, but also explore how to involve patients in the design process, implementation, and long term use of health information systems, and will be of interest to researchers, health practitioners, and patients alike.

Society 5.0 and Next Generation Healthcare Zodwa Dlamini, 2023-08-08. This book analyses the ability of technological advancements to represent, enhance, and empower multidisciplinary in the context of Society 5.0 and next generation medicine. New technologies allow patients to communicate with medical personnel anytime, anywhere, and shape the terrain of healthcare ecosystem at an unprecedented rate. Five main trends become apparent in this process: Hybrid care models combining virtual and in-person services; digitization of healthcare specialties; increased Artificial Intelligence (AI) adoption; health systems moving to the cloud; and advanced precision medicine. In its chapters, the book dissects the important roles for technologies in areas such as digital twinning, big data, Internet of Things (IoT), AI, cyber physical systems, blockchain technology to lead the healthcare digitalization envisioned in Society 5.0. Throughout the book, the authors discuss how to incorporate these new technologies legally, ethically, safely, and securely, and in keeping with the highest standards of human rights. It also advocates for the need for careful oversight and mindful allocation of resources and energy for sustainable development. This book, written by experts in the field from academia and industry, will appeal to researchers, healthcare

professionals policy makers teachers and students interested in the ways healthcare is reorganized based on digital transformation efforts and the rethinking of care including technologies Health Care Will Not Reform Itself George C.
