Introduction to Neuro-Fuzzy Systems Robert Fuller,2013-06-05 Fuzzy sets were introduced by Zadeh 1965 as a means of representing and manipulating data that was not precise but rather fuzzy Fuzzy logic provides an inference morphology that enables approximate human reasoning capabilities to be applied to knowledge based systems The theory of fuzzy logic provides a mathematical strength to capture the uncertainties associated with human cognitive processes such as thinking and reasoning The conventional approaches to knowledge representation lack the means for representing the meaning of fuzzy concepts As a consequence the approaches based on first order logic and classical probability theory do not provide an appropriate conceptual framework for dealing with the representation of commonsense knowledge since such knowledge is by its nature both lexically imprecise and noncategorical The development of fuzzy logic was motivated in large measure by the need for a conceptual framework which can address the issue of uncertainty and lexical imprecision Some of the essential characteristics of fuzzy logic relate to the following 242 In fuzzy logic exact reasoning is viewed as a limiting case of approximate reasoning In fuzzy logic everything is a matter of degree In fuzzy logic knowledge is interpreted a collection of elastic or equivalently fuzzy constraint on a collection of variables Inference is viewed as a process of propagation of elastic constraints Any logical system can be fuzzified There are two main characteristics of fuzzy systems that give them better performance for specific applications **Disabled USA.** ,1987 Sustainability Marketing Frank-Martin Belz,Ken Peattie,2012-10-29 The new and extended Second Edition of the award winning textbook Sustainability Marketing A Global Perspective provides a sustainability oriented vision of marketing for the twenty first century Adopting a consumer marketing focus it emphasises integrating sustainability principles into both marketing theory and the practical decision making of marketing managers The book shows how the complexities of sustainability issues can be addressed by marketers through a systematic step by step approach The steps involve an analysis of socio environmental priorities to complement conventional consumer research an integration of social ethical and environmental values into marketing strategy development a new consumer oriented sustainability marketing mix to replace the outmoded and producer oriented 4Ps and finally an analysis of how marketing can go beyond responding to social change to contribute to a transformation to a more sustainable society Without taking such steps marketing will continue to drive global crises linked to climate change poverty food shortages oil depletion and species extinction instead of helping to tackle them A comprehensive package of supplementary materials for this text is available at www.wiley.com/college/belz View the authors blog at www.sustainability
