Operating Electric Vehicle Dr. Mahesh Kumar K M, Dr. Nellore Manoj Kumar, Er. Hemavathi S, Dr. Ashish

Verma, 2022-10-01 Electric vehicles EVs are a novel idea in the automobile sector While some manufacturers have built their whole lineup of electric automobiles to be environmentally friendly others provide hybrids that can run on either electricity or gasoline The Ford Focus Electric Nissan Leaf Tesla Model S and Chevrolet Volt are just a few examples of electric vehicles that may help you save money and reduce your impact on the environment Pollution and greenhouse gases are threats that we face because of the large amounts of carbon emissions released into the environment by automobiles One of the best things we can do for the world we live in is to buy an electric automobile There are financial incentives for becoming green and one of them is purchasing an electric vehicle The potential increase in the car's price is outweighed by the benefits When weighing the pros and drawbacks of buying an EV there are still factors to think about Electric vehicles are powered by onboard rechargeable batteries Not only do these batteries keep the automobile running but they also keep the lights and wipers operational The battery capacity of electric vehicles is typically higher than that of conventional gasoline vehicles Batteries of this kind are commonly used to kickstart a gasoline motor The only real difference is that electric cars utilize a greater quantity of them to power the motor

A Comparative Analysis of Taxes and CO2 Emissions from Passenger Cars in the Nordic Countries Henrik Duer, Camilla Rosenhagen, Nordic Council of Ministers, 2011 The report discusses how economic instruments can be used to reduce CO2 emissions from passenger cars in the Nordic countries The analysis indicate that the registration tax and the annual circulation tax can contribute to a reduction in the average CO2 emission from new cars company car schemes in the Nordic countries provide incentives for larger cars and increased driving because of subsidies and this has long term effect as a large share of new cars are registered as company cars but are used as private cars most of their lives CO2 differentiated taxes can provide incentives to consumers to purchase CO2 efficient cars targeted broader packages which besides providing tax incentives also offer advantages to more environmentally friendly cars can be more effective than general tax increases transparency of targets and instruments is crucial for a large diffusion of CO2 efficient cars
