to excessive noise exposure is of particular concern to industry and to the federal government In the early 1970s the United States Congress passed the Occupational Safety and Health Act OSHA which sets criteria for health hazards and established limits for noise exposure of industrial workers The OSHA Noise Standard was amended in 1982 to require audiometric testing of all employees exposed to noise levels of 85 dB or above for eight hours A NOISE IN COMMERCIAL AND INSTITUTIONAL BUILDINGS While noise levels in offices stores schools and other commercial and institutional buildings seldom reach those encountered in many industrial environments they often reach levels which are distracting to the occupants of such buildings Impairment of speech communication among workers or inversely the lack of speech privacy are both deterrents to efficiency and productivity and are detrimental to the occupants comfort and sense of well being
