Quality Management in Micro firms - Myth or Reality? A Maltese Micro Manufacturing firm under review Edward de Brincat, 2014-02-01 Manufacturing companies including a local micro enterprise Quality Postform Ltd are persistently facing competitive pressures as a consequence of customers demanding higher quality products The emergence of Quality Management has been attributed by many researchers and Quality Gurus including Phil Crosby as a strategic imperative for typical organisations to survive within a highly competitive environment Nevertheless research carried out throughout the past years is relatively restricted regarding the practicality of micro manufacturing firms in implementing Crosby s Quality Improvement Programme which is claimed to be highly beneficial in typical situations This dissertation seeks to investigate this scenario from both a descriptive and critical perspective towards Quality Postform Ltd The research provides a critical evaluation of the academic contributions towards the quality management concept Distinct disputed viewpoints have been identified focusing on Crosby s 14 Step Quality Improvement Programme From one end of the spectrum supporters uphold that claimed benefits have been acknowledged Alternatively others sustain that in essence a

Quality Improvement Programme is counter productive in terms of its application within Small and Medium sized Enterprises However the researcher has identified four key pre requisites in order for micro firms to effectively implement Crosby s programme These include management commitment the acknowledgement of a quality problem the organisation s readiness to embrace change together with the suppliers readiness to support the quality programme The methodology applied to assess the presence of these four pre requisites at QPL was to compile primary qualitative data through one to one face to face interviews with key management officials This approach is justified due to the absence of formalised documentation and as a result it is imperative to assess that historical data on Quality Systems is seriously lacking at QPL The field research outcome reveals that QPL s management is experiencing serious doubts regarding the feasibility and practicality of the program s implementation within a micro manufacturing firm This is the case primarily whenever the latter is facing limited financial and human resource capabilities such as at QPL The research findings disclose that none of the four pre requisites are present within this micro firm Moreover it confirms the scepticism on the part of Social Entrepreneurship Constant Beugré,2016-11-03 Social entrepreneurship differs from traditional forms of entrepreneurship in that the primary goal of the social venture is to address social problems and needs that are as yet unmet The driving force of such ventures is social value creation This new textbook aims to provide a comprehensive cutting edge resource for students introducing them to the unique concerns and challenges that face social ventures through a comparison with the principles of traditional entrepreneurship The book consists of fourteen chapters covering all aspects of venture creation and management from writing a business plan to financing people management marketing and social impact measurement Social Entrepreneurship uses real life examples and sources to expose students to contemporary developments in the field encouraging them to think critically about the issues faced by social ventures across the globe and experiential exercises and assignments are included to provide students with hands on experience in creating and managing their own social ventures Also containing review and application questions illustrative cases definitions of key terms and a comprehensive companion website Social Entrepreneurship is the essential guide to this rapidly emerging field Visit the companion website at www.routledge.com/cw/beugre to find For Instructors PowerPoint slides Multiple choice questions For Students Extra illustrative cases Web links Links to video
