An Applied Guide to Process and Plant Design Sean Moran, 2019-06-12 An Applied Guide to Process and Plant Design 2nd edition is a guide to process plant design for both students and professional engineers. The book covers plant layout and the use of spreadsheet programs and key drawings produced by professional engineers as aids to design subjects that are usually learned on the job rather than in education. You will learn how to produce smarter plant design through the use of computer tools including Excel and AutoCAD. What If Analysis, statistical tools, and Visual Basic for more complex problems. The book also includes a wealth of selection tables covering the key aspects of professional plant design which engineering students and early career engineers tend to find most challenging. Professor Moran draws on over 20 years experience in process design to create an essential foundational book ideal for those who are new to process design compliant with both professional practice and the IChemE degree accreditation guidelines. Includes new and expanded content including illustrative case studies and practical examples. Explains how to deliver a process design that meets both business and safety criteria. Covers plant layout and the use of spreadsheet programs and key drawings as aids to design. Includes a comprehensive set of selection tables covering aspects of professional plant design which early career designers find most challenging.

Smart Plant Breeding for Vegetable Crops in Post-genomics Era Saurabh Singh, Devender Sharma, Susheel Kumar Sharma, Rajender Singh, 2023-01-01 This book dispenses a comprehensive coverage of up to date account of genomics and genome editing enriched smart plant breeding approaches for enhancing genetic gains in vegetable crops in the post genomics era. The main focus of the present volume is to illuminate the applications of new techniques evolved in the post genomics era. The techniques covered are high throughput sequencing of DNA and RNA, genome editing, epigenetics, and epigenomics, genotype by sequencing, GBS, QTL seq, and RNA seq for transcriptome analysis. Vegetables are the important component of healthy diet, source of energy, and hold a promising position in building up a strong immunity. Zero hunger and attaining the food and nutritional security is the top priority of United Nations development goals. Smart breeding of food and vegetable crops to fight the challenges ahead in sustainable manner by keeping the harmony with nature is an important approach to fulfill the United Nations Sustainable Development Goals (UN SDGs). This edited book highlights the modern results in smart vegetable breeding in the post genomics era and forecasts crucial areas of future needs. It is an important reference for the readers, students, researchers, scientists in academia and research industries to provide them comprehensive information of innovative approaches for crop improvement in the post genomics era and in the era of and climate change. Even the readers, academia, social activists, and others fond of reading will get a fair idea of journey travelled so far and future roadmap for fighting the challenges ahead to meet the sustainable development goals.

Smart Plant Breeding for Field Crops in Post-genomics Era Devender Sharma, Saurabh Singh, Susheel K. Sharma, Rajender Singh, 2023-04-28 This book emphasizes on cutting edge next generation smart plant breeding approaches for maximizing the

use of genomic resources generated by high throughput genomics in the post genomic era Through this book the readers would learn about the recent development in the genomic approaches such as genotype by sequencing GBS for genomic analysis SNPs Single Nucleotide Polymorphism whole genome re sequencing WGRS and RNAseq for transcriptomic analysis DEGs Differentially Expressed Genes To maximize the genetic gains in the cereal food crops the book covers topics on transgenic breeding genome editing high throughput phenotyping reliable precision phenotyping and genomic information based analysis In the era of climate change and the ever increasing population food security and nutritional security are the primary concern of plant breeders growers and policymakers to address the UN s sustainable development goals Chapters of this book cohere around these goals and covers techniques such as QTL mapping association studies candidate gene identification omics RNAi through micro RNA miRNA small interfering RNA siRNA and artificial micro RNA amiRNA It also covers other genomic techniques like antisense technology genome editing CRISPR cas9 base editing and epigenomics that assist the crop improvement programmes to fulfil the UNs sustainable development goals It explores the influence of rapidly available sequencing data assisting in the next generation breeding programmes This volume is a productive resource for the students researchers scientists teachers public and private sector stakeholders involved in the genetic enhancement of cereal crops

Water Resources Management Robert C. Brears, 2024-04-01 Water resource management consists of planning developing distributing and managing the available water resources With increasing population growth urbanization and climate change water management becomes more demanding This book presents innovative solutions for present as well as future challenges we are facing in water conservation and water quality protection The 2nd Ed entails new figures percentages latest information trends and all case studies updated with new ones Provides a green perspective on how water is and can be used The update will entail new figures percentages latest information trends and all case studies updated with new ones

The Engineer's Guide to Plant Layout and Piping Design for the Oil and Gas Industries Geoff B. Barker, 2017-11-25 The Engineer s Guide to Plant Layout and Piping Design for the Oil and Gas Industries gives pipeline engineers and plant managers a critical real world reference to design manage and implement safe and effective plants and piping systems for today s operations This book fills a training void with complete and practical understanding of the requirements and procedures for producing a safe economical operable and maintainable process facility Easy to understand for the novice this guide includes critical standards newer designs practical checklists and rules of thumb Due to a lack of structured training in academic and technical institutions engineers and pipe designers today may understand various computer software programs but lack the fundamental understanding and implementation of how to lay out process plants and run piping correctly in the oil and gas industry Starting with basic terms codes and basis for selection the book focuses on each piece of equipment such as pumps towers underground piping pipe sizes and supports then goes on to cover piping stress analysis and the daily needed calculations to use on the job Delivers a practical guide to pipe supports structures and

hangers available in one go to source Includes information on stress analysis basics quick checks pipe sizing and pressure drop Ensures compliance with the latest piping and plant layout codes and complies with worldwide risk management legislation and HSE Focuses on each piece of equipment such as pumps towers underground piping pipe sizes and supports Covers piping stress analysis and the daily needed calculations to use on the job
