

The M800 is designed to work on any diesel engine with induction timing and a timing position reasonably.

### Features

The M800 Diesel Timing Meter consists of both a precision Timing Meter and a tachometer used in servicing modern diesel engines. A Luminosity Probe is glow plug substitute with a transparent window permits the light of combustion to be seen outside the engine. A Photo Detector senses this light. A Repetitive Pickup is inserted into a holder, normally located at the front of the engine near the harmonic balancer. This probe senses a notch or protrusion in the rotating member. By processing these signals, the meter simultaneously displays the timing angle in crankshaft degrees on the upper meter and engine rpm on the lower meter. This meter provides extremely accurate, reliable, and repeatable readings.

Diagnosis of a number of engine problems can be detected by simply installing the Luminosity Probe in any cylinder and making a visual check of the combustion. With a minimum of experience, misfiring can be detected easily.

### Meter Scales

The M800 consists of two meters in one case. The upper meter indicates engine timing in  $1/2^\circ$  increments from  $-20^\circ$  After Top Dead Center (ATDC) to  $20^\circ$  Before Top Dead Center (BTDC). The lower meter indicates engine revolutions per minute (rpm) on the upper scale from 200 to 1800 rpm with 20 rpm per division, and the lower scale from 0 to 6000 rpm with 200 rpm per division.

### Settings

The tachometer scale switch on the left selects 200-1800 rpm or 0-6000 rpm. The effect switch on the right selects the timing position, "A" (ATDC) and "B" (BTDC).

### Leads

The M800 has battery leads that connect to 12 volt D.C. The Optical Detector is pushed into the Luminosity Probe. The Repetitive Pickup lead connects to the Repetitive Pickup.

### Repetitive Pickup

The Repetitive Pickup is installed into a holder provided by the engine manufacturer. It senses crankshaft position and rpm. A connector is provided for easy replacement.

### Luminosity Probe

When substituted for a glow plug, the Luminosity Probe permits detection of combustion light outside of the engine.
