The book first puts forth the major theoretical formulations: self psychology, object relations, psychodynamics, and then explores diagnostic and therapeutic applications. Narcissism and Politics Jerrold M. Post, 2015. Standing in the Spaces Philip M. Bromberg, 2014-03-05. Early in these essays Bromberg contemplates how one might engage schizoid detachment within an interpersonal perspective. To his surprise, he finds that the road to the patient's disavowed experiences most frequently passes through the analyst's internal conversation as multiple configurations of self/other interaction previously dissociated are set loose first in the analyst and then played out in the interpersonal field. This insight leads to other discoveries. Beneath the dissociative structures seen in schizoid patients and also in other personality disorders, Bromberg regularly finds traumatic experience even in patients not otherwise viewed as traumatized. This discovery allows interpersonal notions of psychic structure to emerge in a new light as Bromberg arrives at the view that all severe character pathology masks dissociative defenses erected to ward off the internal experience of trauma and to keep the external world at bay to avoid retraumatization. These insights in turn open to a new understanding of dissociative processes as intrinsic to the therapeutic process per se. For Bromberg, it is the unanticipated eruption of the patient's relational world with its push/pull impact on the analyst's effort to maintain a therapeutic stance that makes possible the deepest and most therapeutically fruitful type of analytic experience. Bromberg's essays are delightfully unpredictable as they strive to keep the reader continually abreast of how words can and cannot capture the subtle shifts in relatedness that characterize the clinical process. Indeed, at times Bromberg's writing seems vividly to recreate the alternating states of mind of the relational analyst at work. Stirring, evocative in character, and radiating clinical wisdom infused with compassion and wit, *Standing in the Spaces* is a classic.

destined to be read and reread by analysts and therapists for decades to come

The Psychology of Beauty Ellen Sinkman, 2012-12-14 Beauty is often an invisible yet potent presence in clinical work The Psychology of Beauty Creation of a Beautiful Self by Ellen Sinkman LCSW addresses the vital importance of beauty its sources and manifestations in everyone's lives including psychotherapy patients The ability to be mesmerizingly beautiful and beautifully creative strivings toward mastering beauty and wishes to be transformed are universal desires During psychotherapy patients manifest or defend against these forces So it is striking that patients as well as therapists often overlook or dismiss issues about creating beauty in themselves The book introduces this seeming contradiction with the ancient myth of Pygmalion and his sculpture of a beautiful woman These enduring mythic figures represent the wish to emerge as a beautiful being and the wish for the power to create beauty in another Patients in psychotherapy often pursue these elusive goals outside clinical work rather than within treatment Manifold venues enticingly promise reinvention These activities may involve plastic surgery beauty salon makeovers diet gurus elocution coaches tattooing and athletic training Seekers of beauty engage with people whom they see as agents offering them ravishing physical or charismatic attractiveness Psychotherapists may or may not be among agents seen as having the power to transform The quest for beauty is widespread and in many instances non pathological Sinkman looks at multiple avenues of understanding and appreciation of efforts toward beauty including artistic creativity and political activities However there is a spectrum of investment in creating beauty Pursuing beauty can become pathological Therapists need to watch out for its appearance outside the psychoanalytic arena Such material can be missed when the analyst falls into countertransference difficulties such as feeling invested in transforming the patient identifying with the patient's narcissistic injuries and/or needs to compete or enacting battles with the patient Such difficulties interfere with attunement to patients' experiences The Psychology of Beauty considers definitions of beauty gender identity themes and origins of beauty in the mother infant relationship It investigates ugliness sadomasochistic beauty pursuits evolutionary factors and aspects of aging The book highlights emerging clinical material which has yet to gain notice and suggests what analysts may be missing and why
